PLAN A TRIP TO Frankfurt, Germany
DESTINATION OF Tissue Science 2018

Frankfurt is the dynamic business and largest financial centre in continental Europe and ranks among the world's leading financial centres. It is the fifth-largest city in Germany located on both sides of the Main River, south-east of the Taunusmountain range in state of Hesse. The southern part of the city contains the Frankfurt City Forest, Germany's largest city forest. Frankfurt is home to many museums, theatres and a world-class opera. The city is also characterised by various green areas and parks. Frankfurt has varied and comprehensive cultures offering an excellent reputation at both the national and international level. The city is known for its futuristic skyline and the busiest German airport. A unique feature is its significant number of skyscrapers and high-rise buildings in the city center which form the Frankfurt skyline. Frankfurt is home to influential educational institutions. A number of German research groups are engaged in the further development of culture techniques for the cultivation of tissues and bioartificial organ systems. German biotechnology firms have already brought a range of tissue engineering products to the market
