The effect of Equisetum arvense L. ethyl alcohol extract and the four correspond fractions on gastric and prostatic carcinoma cells proliferation in vitro and apoptosis-inducing activities

Ali Karimi
Shahrekord University of Medical Sciences

Ali karimi has been working for about 10 years in traditional medicine field of research in contributing to improve this field of research. He and his Lab have been aimed to evaluate some of the most known extracts on tumoral cell lines in vitro. He also, has many years of experiences in teaching virology and related courses. He published a number of papers in this this area with focusing on the investigation of mode of action of hrbal extracts in growth inhibition of viruses and cancerous cell line in vitro.

Growth Dynamics and drug Resistance Pattern of Methicillin Resistant Staphylococcus aureus under the effect of Panchgavya: Possible Next Generation Cost Effective Natural

Anup kainthola
H.N.B. Garhwal Central University

Dr. Anup Kainthola has his expertise in the field of Medical Microbiology and Immunology. He worked on antibiotic resistance pattern of CA MRSA during his doctoral work and on radiation mediated damages to gastrointestinal tract and translocation of microbes thereafter at Defense Research &Development Organization, India. Out of his passion for natural drugs and antibiotic resistance burden, he successfully demonstrated the activity of panchgavya against drug resistant bacteria. His aim now is to provide molecular grounds to support his theory so as to attract industry players to take panchgavya as final answer to antibiotic resistance.

USE OF TRADITIONAL HERBAL MEDICINES IN THE MANAGEMENT OF NODDING SYNDROME

Lamwaka Alice Veronica
Gulu University

Nodding syndrome is an emerging progressive neurologic disorder that affects mainly children and adolescents aged 5 to 15 years. It is characterized by involuntary head nods which are precipitated at the sight of food and cold weather. Symptoms include multiple convulsions, mental retardation, physical deterioration and disability, malnutrition. Although its positive effects were noted, no researches were carried out to document efficacy and recommend it for use on a larger scale. Studies on medicinal plants in Uganda has been mainly of survey in nature listing plants and their uses for various ailments.
