PROPHETIC CHEMO IS THE SAFEST, CHEAPEST AND MOST EFFECTIVE THERAPY FOR THE CURE OF BREAST CANCER – A REVIEW

M. Musharraf Hussain[1*], Deena AS Hussain[2]

Abstract: Like all other great Prophets of Allah (God) statements of the Prophet Muhammad (peace be upon him) are divinely inspired and true. The Prophet (pbuh) never spoke a single lie in his lifetime. Concerning his statements and utterances Allah (God) says in the Qur'an:

He does not speak anything on his own. It is but a Revelation which is sent down to him (Qur'an, Chapter An-Najm 53:3-4):

Therefore, although the Prophet's arrival was not as a physician or pharmacist, he was inspired by God to make nearly 1000 statements on healing for the benefit of humankind because man needs to remain well free from sickness to fulfill his brief mission on earth. Abu Hurayrah (ra) narrates that Prophet Muhammad said: **Allah did not send down a disease, without having sent down its cure.** (Bukhari and Muslim)

This Prophetic statement indicates that remedies for all diseases are already created by Allah (God), but all remedies are yet to be discovered by scientists. This shows the need for continuous research. No doctor or scientist has created any disease. Doctors only identify disease(s) on the basis of symptoms and manifestations and prescribe medicines. Abu Hurayrah (ra) narrates the greatest statement of the Prophet (pbuh) on healing, which states: **Hold on (use this black seed regularly)! Because it is a remedy (cure) for every disease except death.** (Bukhari, Muslim).

This amazing statement of the Prophet (pbuh) generated tremendous interest among the world's scientific community, which finally led them to carry out extensive scientific investigations on the seed. However, the researchers after carrying out hundreds of studies in various countries finally concluded that black seed can effectively cure 119 diseases and 17 types of cancers including breast cancer. Moreover, the Prophet (pbuh) made the statement at a time when there was no medical science, no pharmacy or chemistry. This large number of diseases curable by black seed demonstrates the authenticity of the Prophet's statement.

In this paper, the learned readers will be informed about the recent findings of a large number of scientific researches about the details of cure made by using Prophetic chemo isolated from *Nigella sativa* seeds on various forms of cancers particularly breast cancer without causing any side effect. We do hope that the information available in this article could be a major break-thorough in global breast cancer research and therapy.

Keywords: Anti-Cancer Drug; Breast Cancer; Black Seed; Black Cumin; Cancer Prevention; Gene Expression; *Nigella sativa* Oil and Extract; Prophetic Chemo; Thymoquinone
