6/9/1996 – 19/9/2011 Senior Resident(SHO) emergency medicine MOH (KSA)
1/2/1992 – 5/9/1996 Medical officer(GP) MOH-SUDAN

KING SAUD MEDICAL CITY-RIYADH:

This medical city(hospital) is located in Riyadh the capital of KSA. IT belongs to the ministry of health and It is known one of the oldest, biggest and most busy hospitals all over the country, with a capacity of more than one and a half thousand beds. There are all the medical and surgical subspecialty. KSMC (Alshumesy) is a well-known and best training Center for the SCFHS in all specialties, and a known referral tertiary care Centre in the ministry of health where difficult cases are received from all over the country. I joined KSMC in 1996 as a medical resident, and stayed until 2011; where I gained a vast clinical and educational experiences and received many courses in patients care and wellbeing. I got the chances to practice all the emergency and elective procedures. I was lucky enough and had the opportunities to attach and work in almost all the medical subspecialties including emergency department, the cardiology, endocrinology, ICU, ID, and others..
KSMC is accredited by JCI and SBAHI.

PRINCE SULTAN MILITARY MEDICAL CITY:

PSMMC is located in Riyadh the capital of the KSA, it is one of the busiest medical cities in the KSA, besides being the main complementary referral tertiary care hospital in the Ministry of Defense of the Kingdom of Saudi Arabia, with a capacity of 1200 beds distributed between its 2 parts (the General hospital and Prince Sultan Cardiac Centre).
The General Medicine Department has different subspecialties, fathered by internal medicine division; which includes: pulmonology, rheumatology, gastroenterology& hepatology, endocrine & diabetes, hematology, oncology, and dermatology. The internal medicine division is well supported by many teams and backed up by well-equipped radiology, radio interventional unit, organ transplant unit, and a huge qualified lab. The internal medicine specialties occupy about 600 beds distributed within the hospital. The flow of medical cases through ER is around 30 to 50 patient per day, in addition to patients admitted through OPD or referred and faxed from all over the country.
PSMMC and Cardiac Centre is accredited by the JCI and SBAHI.

Preferred places of work:

I believe the general medicine is the backbone of all medicine; that is why I prefer to work in the area of general internal medicine to manage and care chronic and acute medical cases; with a full intension to continue my medical educations and experiences in medical subspecialties like endocrine &diabetes, gastroenterology , cardiology, or hematology.

MY Current Employment Description:

My activities as consultant in the department of internal medicine department differs according to the site where I am assigned:

- during the on call duties I receive calls from medical residents to clear the diagnoses and to set up the initial management plans of admitted cases which are usually of wide range e.g., chest pain, heart failure, renal failure, syncope, diabetic ketoacidosis, strokes, toxins ingestion, drugs overdoses, bronchial asthma, COPD, septicemias and septic shocks, aggression etc..; simply we are seeing all varieties of medical cases.
- As a tertiary care Centre, we receive daily fax referrals of various medically complicated cases from all over the country, looking for further diagnosis and management. My job is to evaluate the cases and to decide whether to accept if they will benefit or to reject.
- I participate actively in the academic activities and modulate daily morning discussions of selected cases given by medical residents.
- As Medical Consultant I lead the team, I conclude the views about diagnosis, management and follow up of the admitted cases under our medical team.
- I am responsible for the final assessment, the investigations to requested, the analysis of results, the diagnosis, the treatment, and the continuous assessment and re-assessment, and final management plans, besides being readily available to attend at any time if I am called in emergency situations.
- I am always helpful and share my experiences and knowledge with registrars, residents and medical students, and they feel at ease working with me.
- As a consultant I am responsible for managing the assigned clinics as per the approved Rota by the CMO according to my approved clinical privileges. I run three OPD clinics each clinic once a week eg.. general medical OPD clinic, diabetic clinic, and anticoagulation clinic.
- I used to write medical reports, discharge summaries and death reports .
- I always show interest and share actively in departmental activities and participate interestingly in the forward planning, and further development of the medical services and working environments.
- I am always responsible for monitoring patients' conditions, their progresses and re-evaluate/reassess and treat them accordingly, and refer them to other specialties whenever necessary, besides providing consultation services to other physicians and specialties whenever requested.
- I always explain procedures and discuss diagnostic results or prescribed treatments with the patients and their attendants.
- I do daily rounds for my inpatients and the referred patients, write the patients their medical records on time, and update their progress notes.

- I am always keen to authenticate and sing the medical record/progress notes with date, time and employee ID number, stamp every time. And also review and countersign all junior medical staff notes related to their patients.
- I always consciously insure the implementation of all the approved policies and procedures, rules, regulations, protocols and guidelines, clinical pathways that guide and support the provision of clinical services.
- I always ensure the Values and medical ethics are respected and well observed.
- I always accept admission of patients under my care whenever indicated within the limits of approved and assigned privileges, and will prescribe or administer therapy, medication, and other specialized medical care to treat and/or prevent illnesses accordingly..
- Deputize for my superior as required and shares workload in my specialty during the absence and vacations of my colleagues.
- I direct and coordinate activities of nurses, assistants, specialists, therapists, and other medical staff in patient care, contribute to the development of policies and procedures as part of the continuous quality improvement of the department and serve on department/ hospital comities as requested.
- Participates in the Major Disaster Plan of the PSMMC and serve on PSMMC committees as requested.
- I respect patients and their families to promote a patient-centered care culture and support quality improvement and patient safety activities, as an individual or as part of a multidisciplinary team and perform other applicable tasks and duties assigned within the realm of my knowledge, skills and abilities, within the hospital and/or affiliated medical facilities whenever requested.
- I used to act as modulator for medical cases and a leader of discussions when medical articles are presented by residents as part of my academic activities. and up to now I presented and lead the discussions for many medical articles including; Sudden Loss of Vision, Heart Failure, Septic Shock, Iron Deficiency Anemia Workup, New Oral Anticoagulants etc…
- I am interested in medical studies among my work experience, and the most recent cases I did are: 1- one case of PUO & significant progressive wt. loss; our team successfully proved it out as mesenteric TB; after a long journey of work participated by other specialties under our medical team leadership; including images, labs, surgical and interventional procedures.
- and another case study of Post contrast nephropathy (acute renal failure) with ACS and congestive heart failure associated with a very low ejection fraction (10%) that improved dramatically (to 55%) clinically, radiological and even ecologically, with the proper management and was discharged in good health.
- I am keen to keep myself updated and try to participate in symposia and workshops in the internal medicine inside and outside Saudi Arabia; especially

those with clinical and therapeutic issues like e.g. NOACs, diabetes therapy updates, hypertensive therapy updates, strokes and heart failure updates etc.

- I am interested in medical education and have good impact as a team leader, and as an educator among interns and residents and they like to work with me, I do my regular evaluations to the students, residents. Also I share in evaluating and interviewing the employed if requested by the CMO.

SPECIAL PROFESSIONAL SKILLS:

I have good technical skills of the following:

- I have appropriate technical skills (both diagnostic and therapeutic) and good interpersonal and communicational skills appropriate to the level of practice.
- I have got basic computer skills to enable utilization of the Electronic Medical Records, and other practices relevant IT systems.
- I have a good ability to work in a multi-cultural environment.
- I am self-motivated and fully aware about the current trends in the field.
- I am Fluent in writing and speaking both Arabic and English languages.
- I have got good interpretational knowledge of the ECG, radiological and u/s images and other manual professional skills to perform many of the elective and emergency medical procedures as diagnostic and therapeutic such as intubation as elective and rapid sequence , ambobag, DC shocks applications, peripheral and central lines insertion, peritoneal and pleural tapping…etc
