Biography

Miss Tonu Angaila Chithung studied Biotechnology during Under Graduation at St. Joseph's University, Bengaluru, India in 2016. She then studied Post Graduation in Plant Molecular Biology and Biotechnology at the University of Delhi, India in 2018. During the course, she got the opportunity to work on a dissertation thesis titled "Characterization of miR397b, miR1425 and miR1871 in rice". She cleared the UGC-NET JRF exam the same year she graduated Master's degree. She then joined the Department of Plant Molecular Biology, at the University of Delhi as a PhD student in 2019, under the supervision of Prof. Saurabh Raghuvanshi. She also volunteered during the first phase of the pandemic in 2020, where she worked in the covid-19 testing for patients. She was awarded the best speaker at the 34Th DPMB Annual Symposium 2022. Her research interest revolves around the miRNA world, starting from the biogenesis to functioning and the whole aspect of its role from the evolutionary point of view.
