About London

London is the capital city of the United Kingdom. It is the U.K.'s largest metropolis and its economic, transportation, and cultural centre. London is also among the oldest of the world's great cities, with its history spanning nearly two millennia. London is one of the most diverse and cosmopolitan cities in the world; but where is it actually located? London is the capital city of England and is located in the south east of the country. Although a country in its own right, England is also part of the United Kingdom alongside Northern Ireland, Scotland and Wales. Apart from Big Ben and Buckingham Palace, London is famous for its status as one of the world's greatest cosmopolitan cities, with an incredible array of museums, shops, and restaurants. It's also known for its interesting history in regards to royalty, politics, arts, science, and architecture. London does have a higher crime rate, as it is the popular capital city. Although the crime rate in London has been growing, it is still comparably a safe city. According to the Economists Safe Cities Index, London is the fourteenth safest city in the world.
