3rd International conference on

Advanced Materials and Nanotechnology

April 17-18, 2023 | London, UK

https://www.meetingsint.com/conferences/advancematerial

Invitation

Dear Attendees

Meetings International proudly announces the ***3rd International Conference on Advanced Materials and Nanotechnology*** scheduled during ***April 17-18, 2023 in London, UK***

The conference emphasizes the theme "***Current Innovations in Advanced Materials and Nanotechnology***".

The Advanced Materials 2023 gathering gives a mind-blowing opportunity to discuss the latest progressions inside the field. This conference brings together the innovations in advanced materials and nanotechnology the key opinion leaders and thought leaders in the field from around the world for two intensive days of scientific presentations, networking as well as engagement with companies developing innovations in tools and technologies in this space. The purpose of Advance Material 2023 is to provide an international technical forum to showcase recent advances in Materials, Nanomaterials and Smart Materials conference operation committee is providing a platform for all the budding young researchers, young investigators to showcase their research and innovation.

Sincerely,

Operating Committee

Advanced Materials 2023

Conference Highlights

- Advanced Nanomaterials/ Nanoparticles
- Material Science and Engineering
- Nanomedicines
- Materials Engineering and Technology
- Advanced Materials Devices
- Graphene and 2D Materials
- Materials for Green Technology
- Nanotechnology
- Science and Technology of Advanced Materials
- Ceramics, Glasses & Composite Materials

- To identify the future directions of research
- Peer review and high quality publication
- Quality research

London Attractions

Explore London

London is the capital and largest city of England and the United Kingdom, with a population of just under 9 million. It stands on the River Thames in south-east England at the head of a 50-mile (80 km) estuary down to the North Sea, and has been a major settlement for two millennia. The City of London, its ancient core and financial centre, was founded by the Romans as Londinium and retains its medieval boundaries. The City of Westminster, to the west of the City of London, has for centuries hosted the national government and parliament. Since the 19th century, the name "London" has also referred to the metropolis around this core, historically split between the counties of Middlesex, Essex, Surrey, Kent, and Hertfordshire, which largely comprises Greater London, governed by the Greater London Authority.

The City of London is a city, ceremonial county and local government district that contains the historic centre and constitutes, alongside Canary Wharf, the primary central business district (CBD) of London. It constituted most of London from its settlement by the Romans in the 1st century AD to the Middle Ages, but the modern area named London has since grown far beyond the City of London boundary. The City is now only a small part of the metropolis of Greater London, though it remains a notable part of central London. Administratively, the City of London is not one of the London boroughs, a status reserved for the other 32 districts (including Greater London's only other city, the City of Westminster). It is also a separate ceremonial county, being an enclave surrounded by Greater London, and is the smallest ceremonial county in the United Kingdom.

Venue
London, UK
