Japan Attractions

Explore Japan

Japan is an enigma. It's the perfect juxtaposition of centuries-old traditions overlapped with lightning speed, cutting-edge technology. Many first-time visitors to Japan are often surprised to learn that, as one of the world's most advanced industrialized nations, this relatively small Asian country also boasts a rich and fascinating history dates back thousands of years.

One of Japan's most visited cities, lovely Kyoto – one of the few cities in the country to be spared the devastation of attracts more than 10 million visitors annually. Most of them are here to explore Kyoto's fine old streets and architecture, much of it unchanged since the Imperial family took up residence here more than 1,000 years ago..

While little needs to be said here of the horrors of the atomic bombing of Hiroshima in August 1945, much can be said of the incredible efforts this vibrant city has made to commemorate the many victims of the world's first nuclear attack. Perhaps even more importantly, Hiroshima has become a symbol of lasting peace.

Visited by more than a million people each year, many from overseas, Hiroshima Peace Memorial Park (Hiroshima Heiwa Kinen Kōen) lies at the epicenter of the atomic blast in what was once a bustling part of the city. Here you'll find a number of important monuments, memorials, and museums relating to the events of that fateful day. Tokyo's most famous landmark, the Imperial Palace with its beautiful 17th-century parks surrounded by walls and moats, is a must-see when visiting the nation's capital. Don't be put off by the fact that the majority of the palace is closed to the public (it's still in use by the Imperial family), as there is still enough to see simply by strolling the grounds.

Venue
Osaka, Japan
