3RD WORLD CONGRESS ON

BIOPOLYMERS & BIOPLASTICS

JULY 20-21,2020 | PARIS, FRANCE

Biopolymers and Bioplastics 2020

Invitation

Biopolymers & Bioplastics 2020

Dear Attendees,

Meetings International proudly announces the 3rd World Congress on Biopolymers & Bioplastics scheduled during July 20-21,2020 in Paris , France. The conference emphasizes the theme "Future and scope of biopolymers & bioplastics".

Biopolymers are polymers produced by living organisms; in other words, they are polymeric biomolecules. Biopolymers contain monomeric units that are covalently bonded to form larger structures. There are three main classes of biopolymers, classified according to the monomeric units used and the structure of the biopolymer formed: polynucleotides (RNA and DNA), which are long polymers composed of 13 or more nucleotide monomers; polypeptides.

Sincerely,

Operating Committee

Biopolymers & Bioplastics 2020

Conference Highlights

Biopolymers & Bioplastics 2020

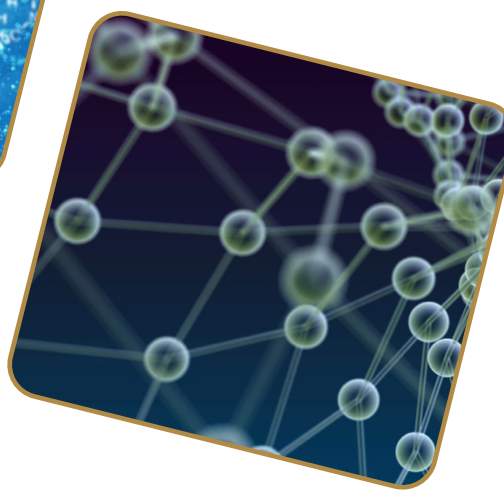

- Synthesis And Characterization Of Biopolymers
- Biopolymers as Materials
- Advantages Of Polymers
- Natural Polymer
- Green Composites In Biopolymer
- Different Classes Of Biopolymers
- Synthesis And Characterization Of Biopolymers
- Environmental Issues Of Recycling And Sustainability Models
- Future And Scope For Biopolymers And Bioplastics
- Bioplastics And Its Application.

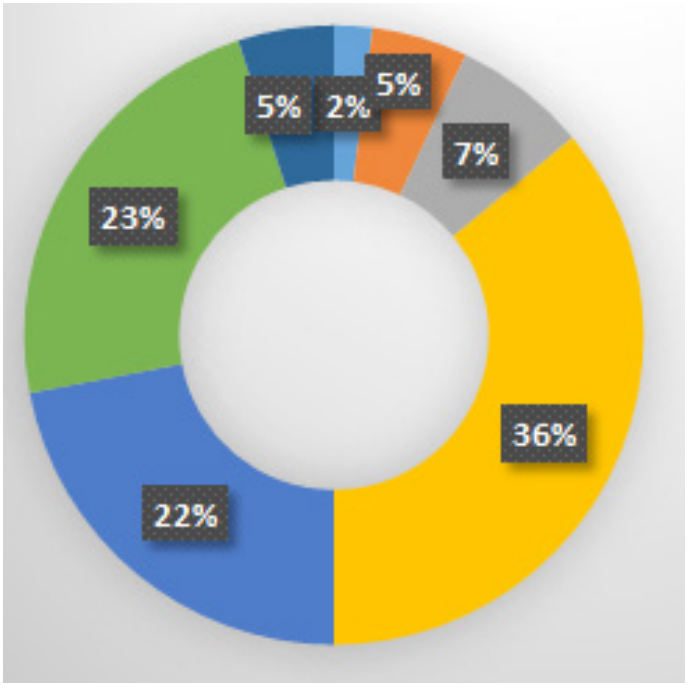

To identify the future directions of research

Peer review and high quality publication

Quality research

Explore Paris

Paris is the capital of France and the country's largest city, also called as the city of lights. It is located on the river Seine. The population of the town is around a pair of two million and also the town features a multi-cultural tradition. The population of the city is around one-fifth of the France, which makes it the second largest metropolitan area in the European region. It is respected for its attractive city plan, architecture, museums, parks, elegant cuisine and abundant monuments.

The climate in Paris is typically gentle over four season Extreme cold or heat is pretty rare, however rain isn't. There are light showers in Paris that can come and go fast all day long. In terms of economy France is ranked as the world's ninth largest and the European Union's second largest economy by purchasing power parity.
