7th International Conference on

Biosensors & Bioelectronics

March 20-21, 2023 | Singapore City, Singapore

https://www.meetingsint.com/conferences/biosensor-bioelectronics

Invitation

Dear Attendees,

Meetings International presents **7th International Conference on Biosensors and Bioelectronics** which will be held during **March 20-21, 2023**, Singapore City, Singapore The conference will bring together leading scientists, early-career researchers to share their perspectives and gather specialists from these interdisciplinary fields to discuss necessary measures needed to develop a new generation of powerful tools for synergistic development in the field of sensors. Through a progression of encouraging plenary talks, inspiring keynote lectures, workshops, industry-sponsored symposia and exhibitions, the conference provides new information about the use of latest technologies and building new links between disciplines enables discussion and new collaborations. We assure our attendees return to their place with the selfbelief to improve their abilities and outfitted with certified approaches to work with us.

Sincerely,

Operating Committee

Biosensors 2023

Conference Highlights

- Biosensors, Bio-sensing Technologies
- Bioelectronics
- Bio-MEMS/NEMS
- Nanotechnology in Biosensors
- Microfluidics- Technology & Healthcare
- Bioinstrumentation
- Optical Biosensors
- Biosensors for Environmental Monitoring
- Biosensors in Drug Discovery
- Biomedical Engineering

Singapore Attractions

Explore Singapore City

Singapore's history dates back at least a millennium, having been a maritime emporium known as Temasek and subsequently as a major constituent part of several successive thalassocratic empires. Its contemporary era began in 1819 when Stamford Raffles established Singapore as an entrepôt trading post of the British Empire. In 1867, the colonies in Southeast Asia were reorganised and Singapore came under the direct control of Britain as part of the Straits Settlements. During the Second World War, Singapore was occupied by Japan in 1942, and returned to British control as a separate crown colony following Japan's surrender in 1945. Singapore gained self-governance in 1959 and in 1963 became part of the new federation of Malaysia, alongside Malaya, North Borneo, and Sarawak. Ideological differences, most notably the perceived encroachment of the egalitarian "Malaysian Malaysia" political ideology led by Lee Kuan Yew into the other constituent entities of Malaysia – at the perceived expense of the bumiputera and the policies of Ketuanan Melayu – eventually led to Singapore's expulsion from the federation two years later; Singapore became an independent sovereign country in 1965.
