Meetings International
WITH US

7th International Conference on

Biosensors & Bioelectronics

April 21-22, 2023 | New York, USA

https://www.meetingsint.com/conferences/biosensor-bioelectronics

Invitation

Dear Attendees,

Meetings International presents **7th International Conference on Biosensors and Bioelectronics** which will be held during **April 21-22, 2023**, New York, USAThe conference will bring together leading scientists, early-career researchers to share their perspectives and gather specialists from these interdisciplinary fields to discuss necessary measures needed to develop a new generation of powerful tools for synergistic development in the field of sensors. Through a progression of encouraging plenary talks, inspiring keynote lectures, workshops, industry-sponsored symposia and exhibitions, the conference provides new information about the use of latest technologies and building new links between disciplines enables discussion and new collaborations. We assure our attendees return to their place with the selfbelief to improve their abilities and outfitted with certified approaches to work with us.

Sincerely,

Operating Committee

Biosensors 2023

Conference Highlights

- Biosensors, Bio-sensing Technologies
- Bioelectronics
- Bio-MEMS/NEMS
- Nanotechnology in Biosensors
- Microfluidics- Technology & Healthcare
- Bioinstrumentation
- Optical Biosensors
- Biosensors for Environmental Monitoring
- Biosensors in Drug Discovery
- Biomedical Engineering

New York Attractions

Explore New York

New York is a constituent state of the United States of America, and one of the 13 original colonies and states. New York is bounded to the west and north by Lake Erie, the Canadian province of Ontario, Lake Ontario, and the Canadian province of Quebec; to the east by the New England states of Vermont, Massachusetts, and Connecticut; to the southeast by the Atlantic Ocean and New Jersey; and to the south by Pennsylvania, the capital is Albany.

Top most city attractions in New York, USA

Some of the newer tourist attractions that have opened in New York in recent years, like the High Line and One World Observatory, offer unique perspectives of the city. Any time of year and any time of day or night there are an endless array of things to see and do in New York. The Statue of Liberty was France's gift to America. Built-in 1886, it remains a famous world symbol of freedom and one of the greatest American icons. It is one of the world's largest statues, standing just under 152 feet tall from the base to the torch, and weighing approximately 450,000 pounds. A walk, peddle, or carriage ride through the crisscrossing pathways of Central Park is a must-do on anyone's New York City itinerary. In winter, you can even lace up your skates and glide across Wollman Rink. This huge park in the city center, a half-mile wide and 2.5 miles long are one of the things that make New York such a beautiful and livable city.
