GLIMPSES OF BIOSIMILAR 2018

What people say about Biosimilar 2018

I was very happy and honored to be invited as a speaker at World Biosimilars Conference in terms to present my company Ewopharma AG as business partner of different pharma companies in Central and Eastern Europe, especially company Biogen with its portfolio of biosimilars and share my commercial experience in launching biosimilars!
I found the conference interesting in terms the organizer selected very qualitative speakers from different areas: innovation and science, manufacturing and commercialization. From my perspective, the most interesting topics were:
Sarfaraz K Niazi: "Biosimilars: Why are they so widely misunderstood?"
Ronald P Dudek: "The adapter CAR Platform: From antibody to CAR T cell therapeutic"
Jose Carlos Ferreyra Lopez: "Market access barriers and market value in Mexican public sector for biosimilars"
Milind Antani: "Similar biologics in India- Impact of regulations on business"
Joel I Osorio: "RegenerAge System "
I can see more potential for further improvement to put 100% focus on Biosimilar topics and to attract more specialists/professionals to gather. It will be excellent if you could attract more speakers from Europe to share their experience. So please consider this option how to attract them in the future.
