ABOUT DUBAI

Brain 2019

Dubai is one of the seven emirates that make up the United Arab Emirates. Dubai is essentially a desert city with superb infrastructure, liberal policies (by regional standards), that became popular for its excellent tourist amenities. Dubai makes a great short break for shopping, partying, sunbathing, fine dining, sporting events, and even a few sinful pleasures. Burj Khalifa, the world's tallest tower naturally dominates the Dubai skyline, but the true majesty of the building is best appreciated up close or, even better, from inside. The design is being influenced by the Islamic architecture of that region. Dubai Mall Housing over 1,200 stores, the Dubai Mall is the second largest mall in the world in terms of land area. Palm Jumeirah artificial island has been built in the shape of a palm tree. Dubai is a city that must be seen to be believed. Record-breaking architecture stands alongside traditional quarters, while man-made islands jut out of the coastline.
