Title: Metabolic Remodeling in Heart Failure : A need to translate knowledge of metabolic derangements into viable therapeutic approaches

Author: Adeeb Ahmed, Interventional Cardiologist, USA

Summary: Treatment which targets for substrate utilization and oxidative stress in mitochondria are currently being translate in patients with heart failure and might be promising tools to improve cardiac function beyond that achieved with current standard of care available neuroendocrine.

Biography: He is currently affiliated with Carle Illinois School of Medicine and University of Illinois School of Medicine. He has been nominated many times as one of the top 10 Interventional Cardiologist in State of Illinois. He is Board Certified by American Board if Internal Medicine in Internal Medicine, Cardiovascular Diseases, Interventional Cardiology.

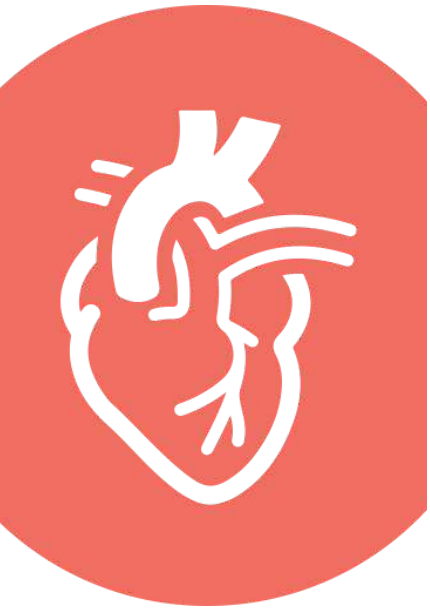

Title: Use of FFR in LM Lesions

Author: Gursel Ates, Director of Anadolu Hospital, Turkey

Summary: If the FFR is between 0.81 and 0.85, then the hemodynamic significance of the LM lesion cannot be accurately determined if the combined FFR of the LM and the downstream disease is ≤0.45.30 In such situations, IVUS guidance is preferred. Accordingly, in the modern era of contemporary CAD decision-making, an invasive assessment of stenosis severity is certainly complementary to a purely angiographic assessment and may be superior.

Biography: He is an Interventional Cardiologist who is working as a Director at Cath. Lab which is affiliated with Johns Hopkins Medicine. He is also an active member in many organizations like European Society of Cardiology, Turkish Society of Cardiology etc., He worked as a cardiologist at the national and international Int.such as Siyami Ersek Gogus Cardiovascular Surgery Hsptl.

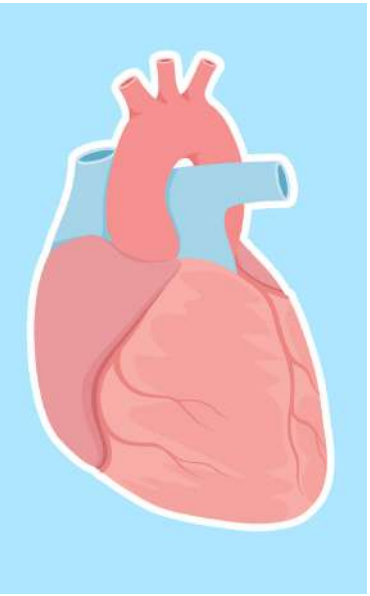

Title: Percutaneous Balloon Mitral Valvuloplasty (BMV) during pregnancy

Author: Hentati Mourad, Head of Rhythmology Department , France

Summary: For pregnant women with severe mitral stenosis, BMV has provides good immediate results without significant maternal risk or fetal morbidity or mortality and a favorable long-term outcome.

Biography: Head of Rhythmology Department Former President of Rhythmology Group Member of EHRA

Title: Symptomatic Mitral Stenosis: Is It Necessary to Take All Patients for Surgery?

Author: Huang Wei Ling, Chairperson at Pain Management Clinic, Brazil

Summary: Not every patient with a symptomatic mitral valve stenosis needs to undergo a surgical procedure. The symptoms presented may be associated with another underlying cause in the energy level that cannot be detected in laboratory tests. Looking at the patient as a whole and not only reasoning on the anatomical alteration found, is fundamental to have success in the treatment. As said Hippocrates, “It is more important to know the person who has the condition than to know which condition the person has.”

Biography: She was responsible for the control of all prescribed antimicrobial medication and received an award for the best paper presented at the Brazilian Hospital Infection Control Congress in 1998. Since 1997, she works with the approach and treatment of all diseases of all systems of the human body.

Title: What could be the Cause of Primary Hypertension?

Author: Huang Wei Ling, Chairperson at Pain Management Clinic, Brazil

Summary: Based on this two case reports, we can address a possible cause for primary hypertension. The cause, in both cases, was attributed to weakened energy of the chakras, a disharmony that cannot be detected by laboratorial exams. Patients with primary hypertension should have their chakras energy evaluated, to treat the root of the problem ant not only the symptoms.

Biography: She was responsible for the control of all prescribed antimicrobial medication and received an award for the best paper presented at the Brazilian Hospital Infection Control Congress in 1998. Since 1997, she works with the approach and treatment of all diseases of all systems of the human body.

Title: What is still unknown in the Prevention and Treatment of Myocardial Infarction?

Author: Huang Wei Ling, Chairperson at Pain Management Clinic, Brazil

Summary: For treatment and prevention of MI, it is necessary to see the patient in the energy level, correcting energy imbalances. As the energy imbalances are not visible to the naked eye, it is important for the physician to analyze the patient not to treat only the symptom but the root of the problem.

Biography: She was responsible for the control of all prescribed antimicrobial medication and received an award for the best paper presented at the Brazilian Hospital Infection Control Congress in 1998. Since 1997, she works with the approach and treatment of all diseases of all systems of the human body.

Title: Early Evaluation of Renal Function in Off pump Coronary Artery Bypass (OPCAB) Surgery and the Conventional CABG

Author: Manzurul Alam, Professor at National Institute of Cardiovascular Diseases & Hospital, Bangladesh

Summary: This study demonstrated effect of surgical revascularization on renal function. Both the Groups showed significant reduction of renal functions in the early (3rd POD) but these reductions proved sub-clinical and were transient By the 8th POD Group A (OPCAB) patients showed significant improvement in Renal function while Group B (CABG) showed lesser improvement.

Biography: He is vice president in Cardiac Surgeons Societies of Bangladesh. He has published different types of Journals. He Achieved a Director Generals Award for Best Academic Performance. He is principle author for many journals.

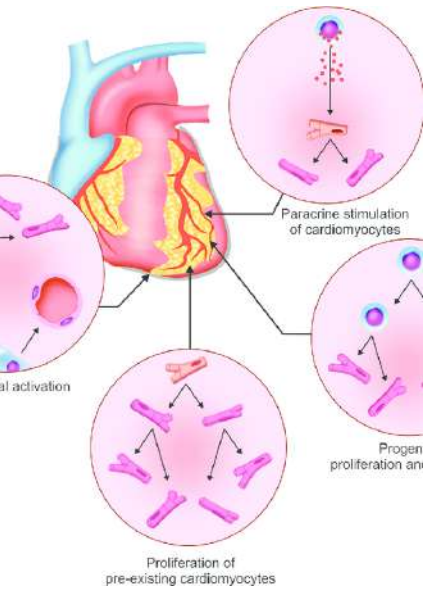

Title: The study of Non-Alcoholic Fatty Liver Disease (NAFLD) Prevalence and Related Metabolic and Vascular Disorders

Author: Mojtaba Mafi, Medical Doctor, Iran

Summary: Our study is continuing to investigate on metabolic disorders for early diagnosis and treatment in order to design some plans for obesity and hypertension prevention from childhood because of more prevalence of obesity in children than adult participants of our study sample.

Biography: Won Awards and Medal from Iran Education Minister**.**

Title: Herbal-based products for the prevention and treatment of cardiovascular diseases

Author: Raymond Muganga, Chairperson, National Pharmacy Council, Rwanda

Summary: A hight consumption of herbs traditionally used as aphrodisiacs may lead to complications for people susceptibel to caerdiaovascular diseases since most of them are tonic and vasodilator. Measures sure be taken to avoid uncontroled usage of these prepartions.

Biography: He was the Head of Pharmacy Department (2005-2007) and current Chairperson of the National Pharmacy Council. He is the member of Research Committee at Ministry of Health in Rwanda.

TESTIMONIALS

"I would like to express my gratitude for your engagement in preparation of the Cancer Therapy Summit 2018. It was a valuable experience."

HONG QIN
Associate Professor
Beckman Research Institute of the City of Hope
USA

"Thanks a lot we had a great time and great conference. We enjoyed the conference ."

CHI-YING HUANG
Professor
National Yang Ming University
Taiwan

"Interesting presentation & worth full spirit of exchange of experience"

IPPEI SAKAMAKI
Senior Doctor
Toyama University Hospital
Japan
