International Conference on

Chronic Disorder & Infectious Diseases

November 23-24, 2020 | Madrid, Spain

Chronic Disorder
2020

Invitation

Chronic Disorder 2020

Dear Attendees,

Meetings International proudly announces the International Conference on Chronic Disorder & Infectious Diseases scheduled during November 23-24, 2020 in Madrid, Spain. The conference emphasizes the theme "Promoting Health, Preventing Disease".

Chronic diseases are long-lasting conditions that usually can be controlled but not cured. People living with chronic illnesses often must manage daily symptoms that affect their quality of life, and experience acute health problems and complications that can shorten their life expectancy. Chronic diseases tend to become more common with age. The leading chronic diseases in developed countries include (in alphabetical order) arthritis, cardiovascular disease such as heart attacks and stroke, cancer such as breast and colon cancer, diabetes, epilepsy and seizures, obesity, and oral health problems. Infectious diseases are illnesses caused by the spread of microorganisms (bacteria, viruses, fungi or parasites) or prions to humans from other humans, animals or the environment, including food and water. Some infections are mild and barely noticeable, but others are severe and life-threatening, and some are resistant to treatment. Infection can be transmitted in a variety of ways. The immune system is an effective barrier against infectious agents, but colonies of pathogens may grow too large for the immune system to fight. At this stage, infections become harmful. Facts: Infection is the effect of a foreign organism in the body. Types of infection include bacterial, fungal, viral, protozoan, parasitic, and prion disease. They are classified by the type of organism causing the infection. Infections can range from mild inflammation in one person to an epidemic.

Sincerely,

Operating Committee

To identify the future directions of research

Peer review and high quality publication

Quality research

Explore Madrid

Madrid is a city so full of life and culture that it's hard to do justice to it in a few paragraphs. Artistically the city holds its own against any in Europe, with the of the best art museums on the continent where renaissance masterworks and seminal 20th-century pieces are waiting to captivate you. Take in all the historic sights and get the background on the Spanish Empire that spanned the globe in the 16th and 17th-centuries. There are also countless little things that make Madrid memorable, whether that's a café con leche in a stately square, drinks at a rooftop bar or a wander through the Retiro or Casa de Campo on a sunny day.
