

Dear Colleagues,

I am pleased to invite you at the International Conference on Coastal Ecosystem and Management - Coastal Zone 2019, Amsterdam scheduled on September 16-17, 2019.

I am glad to inform you that there is a section dedicated to Coastal Archaeology. The near shore ecosystem includes also archaeological sites: settlements, houses, ports, sanctuaries, wrecks. Artificial elements that has modified landscape and waterscape. The interdisciplinary platform created for Coastal Zone 2019 Conference is a great chance to create a workshop to discuss actual approach to researches, studies, conservation and cultural tourism. The main topics we shall discuss are: coastal archaeological sites: environment, history, settlements and findings, shallow water coastal archaeological surveys and near shore wrecks, methodology of the research (direct surveys, remote sensing, etc.), conservation of the coastal archaeological sites, cultural tourism, coastal and underwater archaeological itineraries.

Looking forward to meet you in Amsterdam!

Thank you for your attention and collaboration!
