ABOUT NEW YORK

Dental Science 2019

New York City's Five Boroughs Brooklyn, Manhattan, the Bronx, Queens and Staten Island are home to 8.2 million inhabitants and a travel destination for millions of visitors every year (50.5 million in 2016, to be exact). One of the world's great Metropolis, New York City is a global Center for Dental science, research, entertainment, art, fashion, media, finance, and trade. The bustling, cosmopolitan heart of the 4th largest megalopolis in the world and by far the most populous city in the United States, New York has long been a key entry point and a elucidate city for the nation. From the Empire State Building towering over the Manhattan skyline, to the Statue of Liberty in the harbour, from the skyscrapers of Wall Street, to the tunnels of the subway, from the naturalistic beauty of Central Park, to the bright signs of Times Square, and from Coney Island in Brooklyn to the Yankee Stadium in the Bronx, New York's landmarks are quintessential American landmarks. Home to the Statue of Liberty, Times Square, Empire State Building, and other iconic sites, New York City is a fast-paced, globally influential Center of art, culture, finance and fashion. The Metropolis 5 boroughs sit where the Hudson River meets the Atlantic Ocean, with the island borough of Manhattan at the "Big Apple" core.
