Title: Influence of Testosterone Replacement Therapy on Metabolic disorders and Autonomic diabetic neuropathy in Patient with Type 2 Diabetes Mellitus and Androgen Deficiency

Dr. Shota Janjgava
Tbilisi Humanitarian University
Georgia

In 2009, Mr. Shota Janjgava graduated Ivane Javakhishvili Tbilisi State University with honors and received MD degree. He continued his postgraduate education at Kiev Medical Academy of Professor Shupika, which he graduated ahead of schedule in 2010, and at the same institute took the courses of retreat with the specialization of Andrology. Since 2012, Mr. Janjgava is employed as endocrinologist-andrologist at the National Institute of Endocrinology. In 2015, he completed his PhD. since 2015 he is Head of Andrology Department, and also from 2017 he is the head of Clinical Trials Department at the National Institute of Endocrinology, vice-president of Georgian Youth Association for the Study of Diabetes and Metabolic Disorders, associated Professor at Tbilisi Humanitarian University and guest professor at Tbilisi State University post-diploma educational medical program.

Title: Glucose Toxicity: The Worldwide Problem and the All-Natural Solution

Dr. John F. Burd
Founder
Lysulin, Inc.
USA

Dr. Burd is Founder & CEO of Lysulin, Inc, and has launched an all-natural, scientifically proven nutraceutical product proven to improve the health of people with diabetes. Dr. Burd was also the cofounder of Sabur Technology, Inc., developing a new non-invasive continuous glucose monitoring technology. Prior to Sabur, Dr. Burd was a General Partner of Windamere Venture Partners. Dr. Burd was previously President & CEO of DexCom, now the leader in continuing glucose monitoring for people with diabetes.

Dr. Burd has authored over 40 publications and holds 35 patents. He graduated from Purdue University with a B.S. in Biochemistry, and earned an M.S. and Ph.D., also in Biochemistry, from the University of Wisconsin. In 2010 Dr. Burd was inducted into the American Association of Clinical Chemistry Hall of Fame and received the Ullman Prize for innovation in clinical chemistry.

Title:

Gerald C. Hsu
Eclaire MD
Foundation
USA

Dr. Gerald C. Hsu received an honourable PhD in mathematics and majored in engineering at MIT. He attended different universities over 17 years and studied seven academic disciplines. He has spent 20,000 hours in T2D research. First, he studied six metabolic diseases and food nutrition during 2010-2013, then conducted research during 2014-2018. His approach is math-physics and quantitative medicine based on mathematics, physics, engineering modelling; signal processing, computer science, big data analytics, statistics, machine learning, and AI. He believes that the better the prediction, the more control you have.

Title: Biochemical and behavioural consequences of ethanol intake in a mouse model of metabolic syndrome.

Dr. Pablo Balino
Jaume University
Spain

Bachelor in Biology from the University of Valencia, Master in Basic and applied Neurosciences by the University of Valencia, and PhD in Biology from Jaume I University.

During the doctorate, his main line of research has focused on the study of the neuroenzymatic mechanisms of brain metabolism of ethanol, as well as its behavioral repercussion. During this period, and supported by a predoctoral fellowship from the Ministry of Science, Innovation and Technology, he completed a 1-year stay at the Center for Alcohol Studies (Rutgers University, New Jersey). After the doctorate, he is awarded with a postdoctoral fellowship belonging to the prestigious European Marie Curie program, becoming a research member of the NEUROACT consortium "A collaborative training program to develop multi-electrode array (MEA) platforms to understand synaptic function and treat diseases of the nervous system ".

He is currently a research fellow in the group of neural systems within the area of physiology at the University Jaume I
