Welcome Message

Meetings International proudly announces the Global Experts Meeting on Diabetes and Endocrinology scheduled during November 13-14, 2017 in Melbourne, Australia. The conference emphasizes the theme "Conquering Diabetes And Endocrinology Challenges".

Meetings International provides an international dais for therapeutic and medical care Professionals to Exchange Ideas, Knowledge and Networking at its 100+ International Conferences.

Prevalence of Endocrinology & Diabetes is increasing among all ages in Asia, mostly due to increases in overweight and obesity, unhealthy diet and physical inactivity. There are about 60 million people with diabetes in the Asian Region or about 10.3% of men and 9.6% of women aged 25 years and over.

Worldwide, high blood glucose kills about 3.4 million people annually. Almost 80% of these deaths occur in low- and middle-income countries, and almost half are people aged less than 70 years. WHO projects diabetes deaths will double between 2005 and 2030.

Diabetes Meeting 2017 will bring together key decision makers and innovators within this rapidly growing field. This intensive 2-Day program will focus on various fields of diabetes and endocrinology.

Meetings International - Diabetes Meeting 2017 will offer you an unmatched attendee experience. In addition to the many scientific sessions and take-home case study examples, you will leave this event with many other novel development strategies. We hope you will join us in Melbourne, Australia this November

Sincerely,
Operating Committee
CEO and Founder
Meetings International PTE LTD.

About Melbourne

Melbourne is Victoria's megalopolis and the employment, managerial, ethnic and restoration center of the state. Melbourne was the initial metropolis following the 1901 Federation of Australia and of the south-eastern part of mainland Australia. Melbourne is the majority congested megalopolis in the Australian state of Victoria, and the next majority populous city in Australia and Oceania. The name "Melbourne" cite to the region of built-up stockpile (as well as Census statistical division) spanning 9,900 km2 (3,800 sq. mi) which comprise the wider metropolitan region. Melbourne paces extremely in literacy, amusement, medical care, research and evolution, touristy and physical activities making it the potentially sustainable megalopolis.

The foremost commuter airport helping the metropolis and the state. Melbourne is next strenuous in Australia, and the Port of Melbourne is Australia's busiest seaport for containerized and general cargo.
