About Dubai

It is often suggested that Dubai is one of the world's most unique cities that just never fails to impress. And this comes from the amazing landscapes made up of palm-shaped islands and some of the tallest buildings in the world. Its science fiction-style technology, such as its fast-hyperloop and flying taxis, perfectly illustrates how Dubai reflects the future like no other city. The rate of development in Dubai is quite spectacular, and it ensures that it ranks among the world's most modern cities. Almost science fiction-like skyscrapers adorn the city skyline, with iconic buildings such as Burj Al-Arab and the Emirates Towers. The Mall of the Emirates is one of the world's largest shopping malls outside of the US (interestingly, the Dubai Mall holds that title), and here can be found the most sophisticated ski slopes on the Planet.
