About Singapore

Singapore is a city-state in Southeast Asia, consisting of small islands, in which the progress of the Western world and Asian culture are harmoniously interwoven. Today, it is one of the richest countries in the world with a developed successful market economy, which is characterized by a favorable business environment, the absence of corruption, and a loyal tax policy. Life in Singapore especially attracts Scandinavian people. Many come to work and build an Asian career. Some come to retire in a country with stable rule and a reliable justice system. Modern Singapore can be spoken about in superlatives. The equatorial climate, clean ecology, various social guarantees, quality educational programs, high medical care, a developed banking system, and business opportunities attract many tourists, investors, and potential immigrants.It is advisable to find a job with a good social package. But only highly qualified specialists can count on it. Many employers prefer not to compensate employees for the cost of housing and transport, believing that high salaries exempt them from this obligation.
