Theme

Emerging Innovative Treatment & Therapeutic Techniques in Infectious Diseases

Welcome Message

Meetings International proudly announces the Global Experts Meeting on Infectious Disease, held during August 13-14, 2018 Tokyo, Japan. The conference emphasizes the theme "Emerging Innovative Treatment & Therapeutic Techniques in Infectious Disease"

Meetings International provides an international dais for therapeutic and medical care Professionals to Exchange Ideas, Knowledge and Networking at its 100+ International Conferences.

Worldwide Infectious Diseases are disorders caused by organisms such as bacteria, viruses, fungi or parasites. Infectious diseases may be of water borne, food borne, vector borne, air borne in human beings as well as in plants and animals. Infectious diseases basically emphasize on the pathogenesis of the bacteria and their therapeutic measures, coalesce of branches of microbiology especially clinical and diagnostic microbiology which deals with the cure and prevention of the Infectious diseases. It represents an increasingly important cause of human morbidity and mortality throughout the world. Vaccine development is thus of great importance in terms of global health.

The knowledge and experience will be shared by attendees from academia, universities, clinical practice, industry and government, making this the largest, most comprehensive group of scientists at a single gathering with participation from across the globe.

Infectious Diseases Meeting-2018 will bring together key decision makers and innovators within this rapidly growing field. This intensive 2-Day program will focus on various fields of diabetes and nutrition.

Meetings International - Infectious Diseases Meeting-2018 will offer you an unmatched attendee experience. In addition to the many scientific sessions and take-home case study examples, you will leave this event with many other novel development strategies.

We are excited about this meeting as well as the opportunities for scientific and social interactions with colleagues from the region and around the world. Join us in 2018, for an enlightening, informative and enriching experience. We look forward to welcoming you in Japan!

Sincerely,

Operating Committee

CEO and Founder

- Gold Sponsor
- Silver Sponsor
- Bronze Sponsor
- Exhibition

For any other and customized packages, write to Program Manager.

About Tokyo

Japan is the second largest Life science market in the world after USA, Occupying about 10% of Market in each of the global drug and Medical devices market. According to Data monitor, the Japanese biotechnology market had total revenue of $ 43.3 Billion in 2013. By 2017, the market is expected to grow to $ 53.8 Billion.

The Japanese pharmaceutical market is the world's second-largest, with 2013 sales estimated at $115 billion. Japan accounts for a little less than 10 percent of the global Pharma market, compared with 38.4 percent for the U.S. and 20.7 percent for Western Europe

The Japanese market is a promising region for proteomics companies, as a high amount of proteomics research is being conducted in the country.

Best Places to Visit in Japan:

The most visited places would be Tokyo, Kyoto, and Nara. Some other places with some frequent tourist sightseeing include Nikko, Kamakura, Hakone, Osaka, and Hiroshima.

However, the most visited places are not necessarily the best. There are many excellent places that are not on the tourist radar.

The Yaeyama Islands and Okinawa are also very beautiful but get a lot fewer tourists.
