8TH WORLD CONGRESS ON

MATERIAL CHEMISTRY

Material Chemistry 2019

September 23-24, 2019 | Paris, France

INVITATION

Material Chemistry 2019

Meetings International proudly announces the **8th World Congress on Material Chemistry** scheduled during **June 26-27, 2019 at Paris, France.** The conference emphasizes the theme "**SUSTAINABLE NEW MATERIALS AND RECYCLING TECHNOLOGY**".

Meetings International provides an international dais for scientists and Materials Researchers professionals to Exchange Ideas, Knowledge and Networking at its **100+ International Conferences**. The importance of Material Chemistry has come into spotlight in the recent years. The main objective of Material Chemistry and engineering is to study and know about the materials and share knowledge of Material Chemistry and engineering in this era and use them for better future.

Sincerely,
Operating Committee
CEO and Founder
Meetings International PTE LTD.

Important Dates

Registration Open: **February 01, 2019**

Abstract Submission Open: **February 01, 2019**

On Spot Registration: **September 23, 2019**

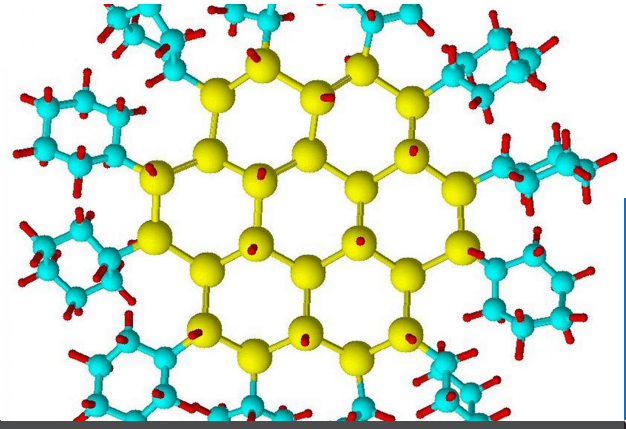

Paris, France

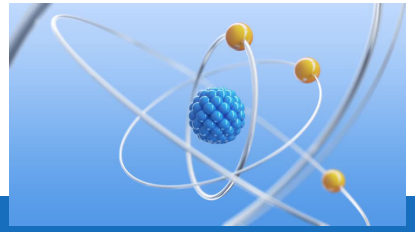

https://www.europeanmeetings.net/conferences/materialschemistry

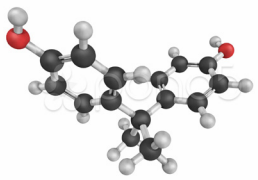

CONFERENCE HIGHLIGHTS

- Characterization and Testing of Materials
- Analytical Techniques and Instrumentation in Materials Chemistry
- Materials Science and Engineering
- Nano materials and Nanotechnology
- Science and Technology of Advanced Materials
- Ceramics and Magnetic Materials
- Applied Materials Chemistry
- Material Science in Construction Engineering
- Polymer Science and Engineering
- Ceramics and Composite Materials
- Materials in Industry
- Materials Chemistry
- Materials Physics
- Fundamentals of Materials Science

Meetings Int. offers

An unique platform for top level research and innovation

Paris, France

https://www.europeanmeetings.net/conferences/materialschemistry

Material Chemistry 2019

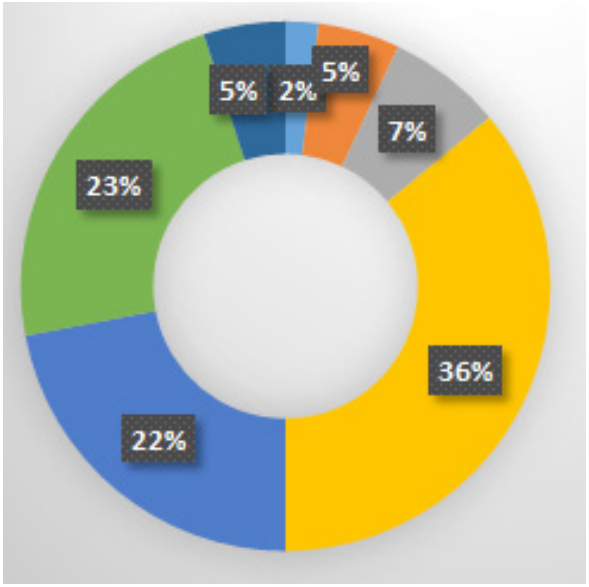

WE VALUE

Quality research

To identify the future directions of research

Peer review and high quality publication

- Head Management/CEO/Manager
- Dean
- Director
- Professor
- Students
- Research Scholars
- Business Enterprenures

ABOUT PARIS

Material Chemistry 2019

Paris is the capital of France and is a major European city and a global center for art, fashion, gastronomy and culture. Its 19th-century cityscape is crisscrossed by wide boulevards and the River Seine. Beyond such landmarks as the Eiffel Tower and the 12th-century, Gothic Notre-Dame cathedral, the city is known for its cafe culture and designer boutiques

Paris has been one of Europe's major centres of finance, commerce, fashion, science, and the arts.

Paris is often referred to as The City of Light, both because of its leading role during the Age of Enlightenment, and more literally because Paris was one of the first large European cities to use gas street lighting on a grand scale on its boulevards and monuments.

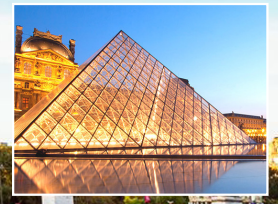

The Eiffel tower

One of the most well know land marks in the world. Built by Gustave Eiffel in 1889 for the World Expo, the construction was completed after 2 years, 2 months and 5 days. Reaching a height of 324 meters, built of iron and more than 7,000 tonnes in weight.
