

Message from the Ephraim suhir

It gives me great pleasure to extend greetings and a warm welcome to everyone attending the 18th International Conference on Materials Research and Technologywhich would be held during June 22-23, 2021 at Osaka, Japan.

Conferences like these offer an inviting setting for scientists, researchers, drug developers and manufacturers to discuss matters of mutual interest while contributing to their professional development and growth.

We believe that Materials Research 2021 will be performed in a hot and friendly atmosphere full of scientific, cultural and social activities. In particular, this conference will motivate junior and young delegates by interacting with expertise in their scientific fields and by encouraging them and improving their confidence of presenting research in an international platform.

The organizing committee is spending a great effort for an exciting and informative conference program including plenary lectures, symposia, workshops on a variety of topics, poster presentations and various programs for participants from all over the world.

We are pleased to invite prospective authors to submit their original contributions to Materials Research 2021 Conference, where you are sure to have a meaningful experience with scholars from around the world.

Yours truly,
Ephraim Suhir
