Dear Colleagues,

Meetings International provides an international dais for scientists and experts to exchange ideas, knowledge and networking at its 100+ International Conferences.

Meetings International invites all the participants across the globe to attend the International Conference on Materials Research and Development during October 29-30, 2018, Prague, Czech Republic. The theme of the conference is "Accelerating Novel Research in Materials Science" and to encourage young minds and their research abilities by providing an opportunity to meet the experts in the field of Materials Research 2018 from all over the globe.

Materials science conference is a syncretic discipline hybridizing metallurgy, ceramics, solid-state physics, and chemistry. A material is defined as a substance (most often a solid, but other condensed phases can be included) that is intended to be used for certain applications. There is a myriad of materials around us they can be found in anything from buildings to spacecraft. Materials can generally be further divided into two classes: crystalline, and non-crystalline. The traditional examples of materials are metals, semiconductor, ceramics and polymers. New and advanced materials that are being developed include Nano-materials, biomaterials, and energy materials to name a few.

Conference Highlights :

- Materials Science and Development
- Future of Materials
- Entrepreneurs Investment
- Mining, metallurgy and materials science
- Material chemistry and physics
- Materials characterization
- Materials for energy conversion and storage devices
- Material engineer training and career
- Electronic and magnetic materials
- Batteries and energy materials
- Nanotechnology in material science
- Metallurgical and materials transaction
