3rd International Conference on

Mechatronics ,Automation And Systems Engineering

April 23-24, 2021 ! Tokyo, Japan

https://www.meetingsint.com/conferences/mechatronics

Invitation

Dear Attendees

Meetings International proudly announces the ***3rd International Conference on Mechatronics, Automation And Systems Engineering*** scheduled during ***April 23-24, 2021 in Tokyo, Japan.***

The conference emphasizes the theme "***Current Trends and Future Directions in The Field of Mechatronics***".

The Mechatronics 2021 gathering gives a mind-blowing opportunity to discuss the latest progressions inside the field. This conference brings together the innovations in Mechatronics and brings the key opinion leaders and thought leaders in the field from around the world for two intensive days of scientific presentations, networking as well as engagement with companies developing innovations in tools and technologies in this space. The purpose of Mechatronics 2021 is to provide an international technical forum to showcase recent advances in Mechatronics ,Automation And Systems Engineering conference operation committee is providing a platform for all the budding young researchers, young investigators to showcase their research and innovation.

Sincerely,

Operating Committee

Mechatronics 2021

Conference Highlights

- Mechatronics
- System Engineering
- Microcontroller
- The Relevant Technology Applications of Mechatronics
- IOT (Internet Of Things)
- Robotics: New Approaches in Automation
- Autonomous Technology
- Machine Vision System
- Sensing And Control Systems
- Bio Mechatronics
- OPT Mechatronics
- Electrical Engineering
- Mechanical Engineering

- To identify the future directions of research
- Peer review and high quality publication
- Quality research

Tokyo Attractions

Explore Tokyo

Tokyo, formerly named "Edo" and literally meaning "east capital," has been the capital city of Japan since 1604. It has a population of over 38 million people, and more flock to the city on weekdays for work and weekends for shopping and sightseeing.

It is a dazzling metropolis that is more like a group of several cities, with a huge size of 1,360 square miles. Millions of tourists visit Japan each year for its unique traditions, sightseeing spots, and interesting subcultures. Many places in Japan are known and visited for the opportunities that their weather provides. Northern prefectures such as Hokkaido, Aomori, and Nagano are famous for winter sports and get several feet of snow every year. Southern prefectures such as those in Kyushu get really hot in the summer.

One of the reasons the Imperial Family live in Tokyo is that the weather here never gets too extreme. It indeed hot and humid in the summer, but in winter it is clear and sunny, and rarely snows. In 2018, it snowed for only two days, and it quickly melted. Mild weather means it's easier to live here and not have to worry about things like wrapping pipes (to stop them from bursting). As someone who despises snow, the lack of it in Tokyo is a big bonus. Tokyo is pretty much in the middle of Japan, a few hours from Kyoto and Osaka as well as a few hours from Hokkaido. Tokyo is also located close to other great places such as the stunning and temple-rich Kamakura and the trendy city of Yokohama.

Venue

Tokyo, Japan

Conference Hotel

ANA Crowne Plaza Narita 68 Horinouchi
Narita-shi, Chiba 286-0107 Tokyo, Japan
