Dear Colleagues,

Meetings International proudly announces the upcoming meeting International Conference on Medical Imaging and Clinical Research scheduled on November 28-29, 2018 in Tokyo, Japan. With a theme of "Medical Imaging for Improved Diagnosis and Treatment".

Meetings International provides a Global Platform for Medical Imaging Professionals, Medical Imaging Practitioners, Medical and Healthcare Professionals to Exchange Ideas, Knowledge and Networking at its 100+ International Conferences.

Medical imaging is involved in both diagnosis and therapy. Using a computer, existing 2D images can be transformed into interactive 3D volumes and results from different modalities can be merged. Furthermore, it is possible to calculate functional areas that were not visible in the primary images. This paper presents examples of clinical applications that are integrated into clinical routine and are based on medical imaging fundamentals. not make insulin.
