Biography

EuroSciCon

Title: the nature of paroxysmal disorders occurring during sleep, and study the impact of antiepileptic drugs (AEDs) on sleep architecture.

Miss. Ana Voitiuk,
Kharkiv Medical Academy of Postgraduate Education, Kharkiv, Ukraine

Epilepsy is closely connected with the sleep-wake cycle: the disease often causes sleep disorder and its structure and this, in turn, worsens epilepsy. Sleep disorders often provoke the appearance of various paroxysmal conditions, which are then difficult to differentiate from epileptic phenomena.
The objective of this study is to determine the nature of paroxysmal disorders occurring during sleep, and study the impact of antiepileptic drugs (AEDs) on sleep architecture.
