Invitation

EuroSciCon welcomes you to the city of art and architecture, and experience the 29th Euro-Global Neurologists Meeting, June 15-16,2020 in Rome, Itlay. The theme of the conference is “Dynamic Challenges and Approaches in Neuroscience and Neurochemistry” will provide you a neurotic opportunity to researchers of all type.

Neurologists Congress 2020 is a significant platform for the neuroscientists, neurochemists, researcher professors from interdisciplinary streams to join together and share their work in an environment conductive to education and interaction. Seasoned scientists, young researchers, mid-career professionals and just starting out are all invited.

With a broad array of keynote presentations, panel discussions, workshops, and poster sessions, the Neurologists Congress 2020 is the perfect venue not only to dive into the neuroscience and neurochemistry involved in the neuron responses and disorders interests but also to expand the scope of your knowledge. All scientific tracks are devoted to explore the subjects such Neurotransmitters, Neurosignal Transduction, Neurological Disorders, Neuroplasticity, Neuroimmunology and Neuropathology, Neuropharmacology and many more.

The Organizing Committee has done its best to set up a framework that we think will allow for a creative interplay of ideas. All we need now to convert the extensive program on paper to an active and vibrant neuroscience and neurochemistry forum in person is your active participation.

About Destination Rome

Rome is the capital city of the Italy which is located in the south central Europe. It is the fourth most populous city in the European Union by population within city limits. The Vatican City (the smallest country in the world) is an independent country inside the city boundaries of Rome, the only existing example of a country within a city: for this reason Rome has been often defined as capital of two states. Rome today is one of the most important tourist destinations of the world, due to the incalculable immensity of its archaeological and artistic treasures, as well as for the charm of its unique traditions, the beauty of its panoramic views, and the majesty of its magnificent “villas”.

Rome has a Mediterranean climate hot, dry summer and mild, humid winters. December, January and February are the coldest months, with a daily mean temperature of 8 °C (46 °F). The perfect time to visit is in the summer-June, July, and August. Rome is predominantly Roman Catholic, and the city has been an important centre of religion and pilgrimage for centuries. People from all over the Christian world visit Vatican City. Rome is a nationwide and major international centre for higher education, containing numerous academies, colleges and universities. It boasts a large variety of academies and colleges, and has always been a major worldwide intellectual and educational centre.
