About Tokyo

Tokyo, formerly named “Edo” and literally meaning “east capital,” has been the capital city of Japan since 1604. It has a population of over 38 million people, and more flock to the city on weekdays for work and weekends for shopping and sightseeing.

It is a dazzling metropolis that is more like a group of several cities, with a huge size of 1,360 square miles. Millions of tourists visit Japan each year for its unique traditions, sight-seeing spots, and interesting subcultures. Many places in Japan are known and visited for the opportunities that their weather provides. Northern prefectures such as Hokkaido, Aomori, and Nagano are famous for winter sports and get several feet of snow every year. Southern prefectures such as those in Kyushu get really hot in the summer.
