Welcome Message

Meetings International proudly announces Global Experts Meeting on at Singapore on March 19-20, 2018. Nutrition is the admission of food, considered in connection to the body's dietary needs. Good nutrition is sufficient, balanced eating regimen consolidated with regular physical exercise. This forms the foundation of good health. Nutrition Meeting 2018 will bring together key decision makers and innovators within this rapidly growing field. This intensive 2-day program will examine different elements of Nutrition and diet. The highlights of the upcoming conference includes Human Nutrition, Pediatric Nutrition, Maternal Nutrition, Sports Nutrition, Gastro-intestinal Disorders and Diet, Cancer and Diet, Eating Disorders, Functional Food, Obesity Diet, Diabetes Friendly Diet, Nutrigenomics, Food Allergies AND Intolerance, Animal Nutrition, Nutritional Security, Clinical Nutrition, Food Borne Illnesses, Genetically Modified Food, Artificial Sweeteners. Today the worldwide nutrition situation is at its extreme. At one end, under-nutrition is the underlying cause of an estimated 3.5 million deaths each year, mostly in kids and pregnant ladies. And on the other side we have a worldwide pandemic of obesity, progressively beginning in adolescence. We have a huge number of people in this world who are at a risk of suffering from chronic diseases related to diet, like coronary illnesses, malignancy and diabetes.

The UN general Assembly declared on April 1st, 2016, the UN decade of action on Nutrition for the period 2016-2025. This decade of action affirms to end all forms of malnutrition. The main aim is to have a planet in which every person independent of race, ethnicity, sexual orientation or socio-economic background can have access to nutritional food so that they can lead a healthy and happy life. Luckily empowering the people to feed themselves is one among the first steps towards a stronger, richer and more democratic world.

The Global Diet and Nutrition Meeting 2018 event will examine novel strategies for improving the nutrition status worldwide. Case studies will be presented that illustrate the progress and the research done in the field of nutrition while leaders in the field will point the way to the future in the field of Nutrition.

Sincerely,

Operating Committee

CEO and Founder

About Singapore

Though the city is small, Singapore is an economic giant. For more than a century it has been South-East Asia's most advanced city. The city is a mixture of Malay, Chinese, Arab, Indian and English societies and religions. Its special ethnic environment invites visitors to explore a wide range of sightseeing and culinary opportunities.

The traditional festivals celebrated throughout the year adds to its cultural attraction. What's more, Singapore offers lavish inns, heavenly food and extraordinary shopping! The Republic of Singapore contains the island of Singapore and 58 or so littler islands. As a result of its effective and resolved government, Singapore has turned into a thriving nation that exceeds expectations in trade and tourism and is a model to developing countries. The capital city, likewise called Singapore, covers about 33% of the main island.

Situated at the tip of the Malay Peninsula, Singapore's tropical atmosphere invites both recreation and business travelers throughout the year. The island's amazing framework empowers guests to make the most of its many locales and attractions in a clean, safe and environment friendly conditions. Award winning Changi Airport gives air-links to major cities around the globe. The subway and train frameworks are quick, clean and effective. Moreover, its best in class cruise terminal has set up Singapore as one of the best cruising centers.

In the city, there is no requirement for a car. Public transportation is phenomenal and strolling is a decent approach to investigate the city. All major tourist attractions are easily accessible by the tour bus. Since the city is just 60 miles from the equator, the tropical temperature doesn't shift by much. Regardless of when you visit, warm climate will always be available. The guest is struck instantly by Singapore's wealth of parks, nature reserves and lavish, tropical greenery.

Singapore's advance in the course of recent decades has been noteworthy, yet the island has not been overpowered by improvement. Guests will find an abundance of historical treasures of the past, in the magnificence of more historical structures, tradition and values that have made due despite significant social and land change.
