Meetings International Conference successfully hosted its Sixth series on the “International Conference on Pediatrics Millennium Charles de Gaulle Hotel in Paris, France during April 14-15, 2022. The conference was organised with a theme focused on “Current Challenges in Delivering Pediatric and Neonatal Research” and it was a great success.

Eminent keynote speakers from various universities addressed the gathering.

The generous response and active participation of the organising committee members played a major role in the success of the conference. On the other hand, we take the opportunity to thank all the speakers, delegates, and participants for providing their valuable support and time for the conference.

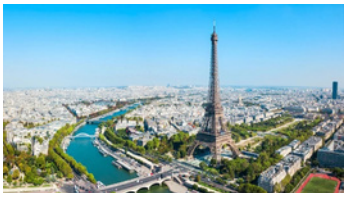

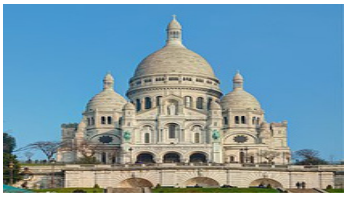

About Venue:

Paris, the capital of France, is renowned for its rich history, stunning architecture, and vibrant culture. Often dubbed “The City of Light” (La Ville Lumière), Paris is a global hub for art, fashion, gastronomy, and culture, making it one of the most visited cities in the world. The city’s origins date back to the 3rd century BC when it was a small Gallic settlement called Lutetia. It grew significantly during the Roman era and later became the capital of the Frankish kingdom under Clovis I in the 5th century. Paris is home to some of the world’s most iconic landmarks. The Eiffel Tower, originally constructed as a temporary exhibit for the 1889 Exposition Universelle, has become a symbol of France and a must-see for tourists. Another architectural marvel is the Gothic cathedral of Notre-Dame, which, despite the devastating fire in 2019, remains a testament to medieval engineering and artistry.
