2ND INTERNATIONAL CONFERENCE ON

PHOTONICS & OPTOELECTRONICS

NOVEMBER 25-26, 2020 | SINGAPORE CITY, SINGAPORE

Photonics 2020

Invitation

Dear Attendees,

Meetings International proudly announces the2nd International Conference on Photonics & Optoelectronics scheduled during November 25-26, 2020 in Singapore City, Singapore. The conference emphasizes the theme "Latest discoveries and computing to advanced imaging technologies in Photonics".

Photonics is a part of study that involves the employment of energy such as light, whose basic component is that the gauge boson. Photonic applications use the gauge boson within the same method that negatronic applications use the electron. Devices that run on light-weight have variety of benefits over people who use electricity. Light-weight travels at regarding ten times the speed that electricity will, which implies (among alternative things) that information transmitted photonically will travel long distances in an exceedingly fraction of the time.

Sincerely,

Operating Committee

Conference Highlights

- Nano photonics and Bio photonics
- Organic photonics
- Photonic Integrated Circuits
- Microwave Photonics
- Optical physics
- Optoelectronics
- Optical Communications and Networking
- Optics and Lasers in Medicine
- Applications and Trends in Photonics
- Advancements in Photonics
- Green Photonics
- Photonic devices and applications

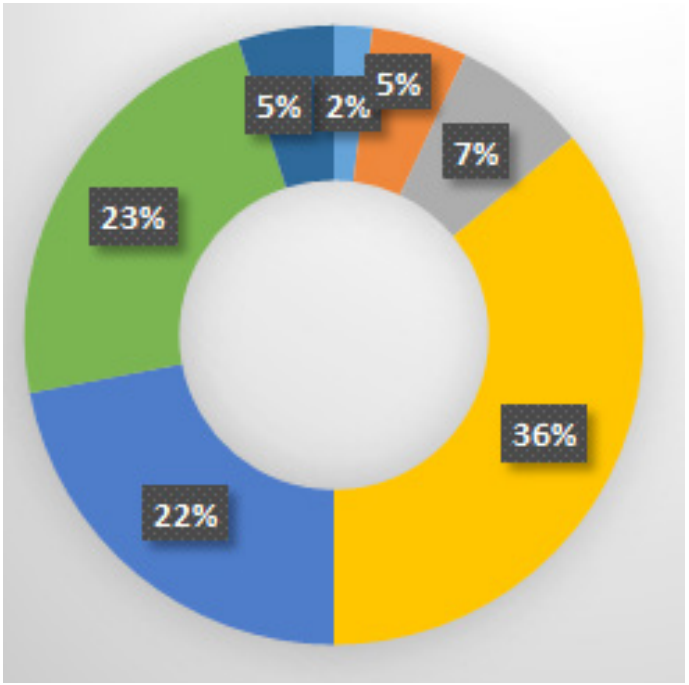

To identify the future directions of research

Peer review and high quality publication

Quality research

Explore Singapore

Singapore has reinvented itself as one of the world's best destinations. With sharp and constant contrasts all over this area you will struggle to find a more diverse and vibrant holiday experience anywhere else. The phrase 'City in a Garden' has been used to describe this magical location in which ancient forests and contemporary architecture blend into one. Old school jungle huts, chic cocktail bars and everything in-between, Singapore is a city of riches both natural and man-made. Singapore offers travelers so much more than just a stop-over destination, there is a wealth of culture and fun just waiting to be discovered.
