

October 12, 2018

Dear Colleagues,

It will be a pleasure meeting you at 3rdWorld Plant Genomics and Plant Science Congress, Osaka in Japan which will be held amid July 15-16, 2019. I have studied on Plant Breeding, Plant Pathology, Morphology and so on. Now I study many things in plant area. Hop Stunt Viroid (HSVd) is also for one of them. Elimination of disease, that is, disease-free plants are very important for human life. This Conference will strive to offer plenty of networking, providing you with the opportunity to meet and interact with distinguished scientists, researchers as well as distinctive experts. Keynote lectures will be delivered by a distinguished international faculty, while with the participation of outstanding experts, productive discussions will be stimulated that will keep plant genomic science professionals up to date on issues affecting the global plant protection and genome research challenges with the aid of advanced molecular plant breeding techniques. With these few words I wish you a successful preparation and fruitful meeting in Osaka. Let's make a useful crop for our future.

Thank you.

Sincerely,

Momma
