

Cyprus University of Technology

Dear Colleagues,

It is with great pleasure that I would like to announce the forthcoming **5th World Plant Genomics and Plant Science Congress**, which will be held in **Paris, France** during **June 29-30, 2021**. The congress will focus on diverse aspects such as breeding, molecular marker development, crop improvement, disease resistance, epigenetics, evolution studies, and pathology as well as understanding tools to overcome barriers and enable successful data analysis and management. Furthermore, this meeting will provide ample opportunities to meet and interact with distinguished scientists, researchers as well as distinctive experts and promote a high level of networking. Keynote lectures will be delivered by distinguished international Faculty, while productive discussions are expected to be stimulated that will keep plant genomic science professionals up to date on issues affecting global plant protection and genome research challenges with the aid of advanced molecular plant breeding techniques. I am looking forward to meeting you all and to joining fruitful discussions.

Sincerely,

Vasileios Fotopoulos
