5th World

# PLANT GENOMICS AND PLANT SCIENCE CONGRESS

**Dates: July 28-29, 2021**

**Venue: Paris, France**

Theme: Surpassing the Vision on Plant Genomics and Plant Science

# Plant Genomics 2021

We are welcoming you to our upcoming "**5th World Plant Genomics and Plant Science Congress**" that will be scheduled in **Paris, France** from **July 28-29, 2021** which includes prompt keynote presentations, Oral talks, Workshops/Symposia, Poster presentations, and Exhibitions. The theme of the conference is, "*Surpassing the Vision in Plant Genomics and Plant Science*".

Meet your target audience and explore your product and services.

- To Meet Experts
- Learning In a New Space
- New Tips & Tactics
- Certification
- Global Networking
- Rebuild New Customer Base
- Brand Establishment

**Abstract Submission**

https://www.meetingsint.com/conferences/plantgenomics/abstract-submission

**Registration link**

https://www.meetingsint.com/conferences/plantgenomics/registration

# Conference Highlights:

- Plant Genome Science
- Agricultural Science
- Molecular Plant Breeding
- Stress Signalling in Plants
- Plant Proteomics and Plant Science
- Plant Morphology and Plant Metabolism
- Crop Improvement and Plant Virology
- Plant Nutritional Genomics
- Plant Biotechnology
- Medicinal and Aromatic Plant Sciences
- Plants and Climate Change- Overcoming Measures

The event focuses on aspects such as breeding, molecular marker development, crop improvement, disease resistance, epigenetics, evolution studies, and pathology as well as understanding tools to overcome the barrier and enable successful data analysis and management. Presentations concentrate not only particular to plant genomics but also crop and forestry research ranging from wheat, barley, maize, and rice to potato, tomato, Arabidopsis, biofuels and various fruits.

## Deadlines:

Abstract submission: **March 22, 2021**
Early bird registration: **March 16, 2021**
Registration closed by **July 28, 2021**

# Exhibitors & Sponsors

## MP Biomedicals

At **MP Biomedicals,** our focus is on reducing the day-to-day complexities and uncertainties that scientists face so that you can move your projects forward quickly and confidently.Our robust, easy-to-use instruments and reagents can be counted on to work every time, delivering high quality samples and high quality data day-in and day-out.Our global reach ensures that we can source the reagents you need, consistently and uninterruptedly, even when other vendors simply can't deliver.

Our flexibility and ability to customize orders gives you the products and services that work best for your projects and not just the products that we've configured to meet the lowest common denominator.And our fast response time to customer inquiries ensures that your workflows keep on flowing.

OZYME

Des femmes et des hommes
au service de vos recherches

## OZYME

Specialist since 1984 in the supply of laboratory products for research, **Ozyme** selects and offers products from the biggest names in cell biology, immunology and molecular biology. Based in the Paris region, the Ozyme team is made up of around forty employees, half of whom, scientists from 3rd university cycles or from engineering schools, are at your service in the fields of support and communication. technical and commercial.

# Plant Genomics 2021

Paris, France's capital is a major European city and a global centre for art, fashion, gastronomy and culture. Its 19th-century cityscape is crisscrossed by wide boulevards and the River Seine. Paris is in the Paris department of the Paris-Isle-of-France region. The French historic, political and economic capital, with a population of only 2.5 million is located in the northern part of France.  Paris has a population of more than 2 million people, and the city is divided into 20 "arrondissements" (districts) which are numbered 1 to 20. The river Seine divides the city into the Rive Gauche on the south and the Rive Droite on the north banks of the river.  The streets where made much wider, places and squares where built and the buildings completely rebuilt.
