Dates: April 29, 2022

Venue: Osaka, Japan(GMT+9)

Theme: Surpassing the Vision on Plant Genomic Sciences

Plant Genomics 2022

Due to amid Covid travel restrictions , this year we are making the **6th World Plant Genomics & Plant Science Congress** digitally and the congress will be scheduled for **April 29, 2022** in **Osaka, Japan(GMT+9)** which includes prompt keynote presentations, Oral talks, Workshops/Symposia, Poster presentations and Exhibitions. The theme of the conference is, "***Surpassing the Vision in Plant Genomic Sciences***". Plant Genomics 2022 is the premier event that brings together a unique and international mix of experts, researchers and decision-makers both from academia and industry across the globe to exchange their knowledge, expertise and research innovations to build a world-class plant genomics conference. Plant Genomics Event encourages focusing mainly on aspects such as breeding, molecular marker development, plant physiology, disease resistance, genome integrity, biotechnology applications and **CRISPR-Cas9 system** as well understanding tools to overcome barriers and enable successful data analysis and management. Presentations concentrate not only particular to plant genome science but also crop and forestry research ranging from wheat, barley, maize and rice to potato, tomato, Arabidopsis, biofuels and various fruits.
