Welcome Message

Meetings International proudly announces the Global expert meeting on plant science and molecular biology scheduled during July 19-20, 2018 in Melbourne, Australia. The conference emphasizes the theme "Explore the Scope of Plant Molecular Biology".

Meetings International provides an international dais for scientists and plant science professionals to Exchange Ideas, Knowledge and Networking at its 100+ International Conferences.

The importance of plants has come into spotlight in the recent years. Many of the floral species have become extinct due to the human activities. Thus, priorities are given for the plant research to produce more production to support the ever-growing population of the world.

According to Global Environment Outlook 4, species extinction is occurring at 100 times the natural rate, and is expected to accelerate to between 1,000 and 10,000 times the natural rate in the coming decades. This extinction will cause the change in the biodiversity which will indirectly affect us.

Plant Science conference 2018 will bring together key decision makers and innovators within this rapidly growing field. This intensive 2-Day program will focus on various fields and technologies in the Plant science.

Meetings International - Plant Science conference 2018 will offer you an unmatched attendee experience. In addition to the many scientific sessions and take-home case study examples, you will leave this event with many other novel development strategies. We hope you will join us in Melbourne, Australia coming April.

Sincerely,

Operating Committee
