Meetings Int. offers

An unique platform for top level research and innovation

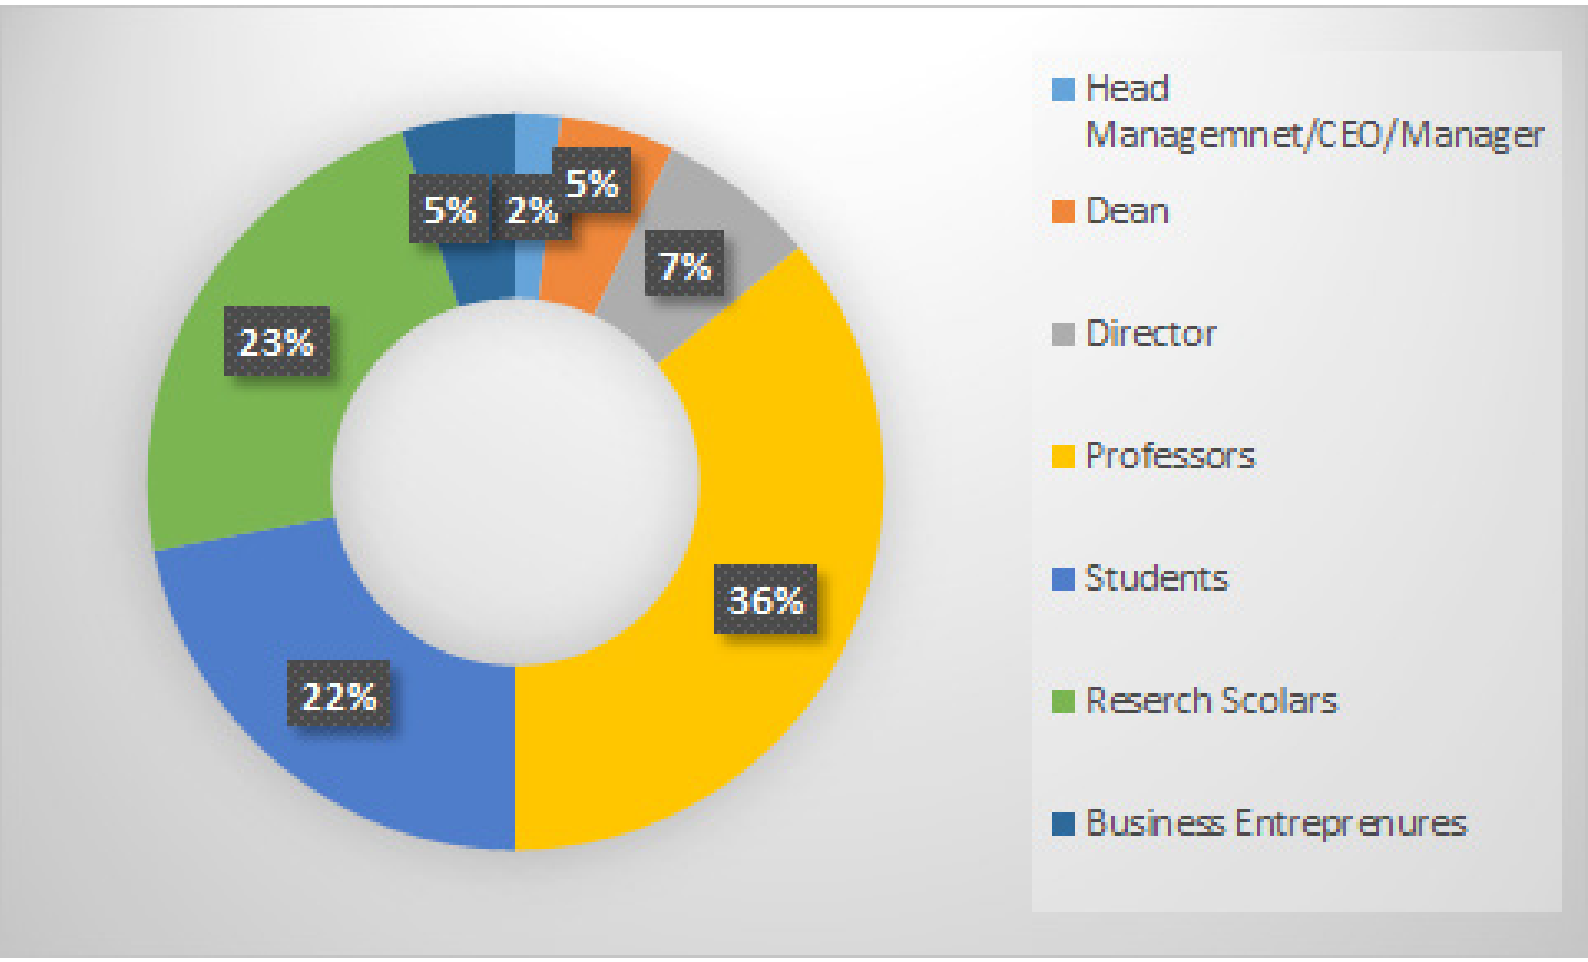

WE VALUE

To identify the future directions of research

Peer review and high quality publication

Quality research

Explore **Singapore**

Singapore officially the Republic of Singapore, sometimes referred to as the Lion City, the Garden City or the Little Red Dot, is a sovereign city state in Southeast Asia. It lies ovne degree (137 km) north of the equator, at the southern tip of peninsular Malaysia, with Indonesia's Riau Islands to the south. Singapore's territory consists of one main island along with 62 other islets. Since independence, extensive land reclamation has increased its total size by 23% (130 km2), and its greening policy has covered the densely populated island with tropical flora, parks and gardens. Stamford Raffles founded colonial Singapore in 1819 as a trading post of the East India Company; after its collapse and the eventual establishment of the British Empire, the islands were ceded to Britain and became part of its Straits Settlements in 1826. During the Second World War, Singapore was occupied by Japan.
