Theme

Innovative Outcomes in Reproductive Biology and Endocrinology

Welcome Message

Meetings International proudly announces the Global Experts Meeting on Reproductive Biology and Endocrinology, held during May7-8, 2018 Tokyo, Japan. The conference emphasizes the theme "Innovative Outcomes in Reproductive Biology and Endocrinology"

Meetings International provides an international dais for therapeutic and medical care Professionals to Exchange Ideas, Knowledge and Networking at its 100+ International Conferences.

Reproductive Biology and Endocrinology includes topics such as the pathophysiology of reproduction (e.g. sterility, infertility and abnormal pregnancy, and reproductive tract infections), age-associated changes and disorders of the reproductive tract, reproductive tissue cancers (e.g. prostate, ovary, uterus, cervix, breast), and the impact of environmental and occupational hazards on reproduction. whereas Endocrinology is the study of the endocrine system in the human body. This is a system of glands which secrete hormones. Hormones are chemicals which affect the actions of different organ systems in the body. Examples include thyroid hormone, growth hormone, insulin and sex hormones.

The knowledge and experience will be shared by attendees from academia, universities, clinical practice, industry and government, making this the largest, most comprehensive group of scientists at a single gathering with participation from across the globe.

Reproductive Endocrinology Meeting-2018 will bring together key decision makers and innovators within this rapidly growing field. This intensive 2-Day program will focus on various fields of diabetes and nutrition.

Meetings International - Reproductive Endocrinology Meeting-2018 will offer you an unmatched attendee experience. In addition to the many scientific sessions and take-home case study examples, you will leave this event with many other novel development strategies.

We are excited about this meeting as well as the opportunities for scientific and social interactions with colleagues from the region and around the world. Join us in 2018, for an enlightening, informative and enriching experience. We look forward to welcoming you in Japan!

Sincerely,

Operating Committee

CEO and Founder

Meetings International PTE LTD.

Who Should Attend?

- Gynaecologists
- Reproductive Epidemiologists
- Andrologists
- Reproductive Endocrinologists
- Urogynecologists
- Reproductive tract oncologists
- Pharmacologists, obstetricians and Clinicians
- Infertility specialists
- Health Care Professionals
- Young Researchers and scientists
- Professors and Assistant Professors

Why Attend?

- 10+ Keynote Speaker Session
- 50+ speaker faculty over 2 full days sharing Evidence Based Nursing practice
- 5+ Workshops
- 13 Interactive sessions
- Mixture of Health care units and Academia Delegates
- Networking

Conference Highlights

- Reproductive Biology
- Reproductive Immunology
- Reproductive Physiology
- Reproductive Technology
- Reproductive Health Commodity Security
- Pregnancy and Pregnancy Complication
- Menopause and Infertility
- Sexually Transmitted Infections/Diseases
- Endocrinology
- Reproductive Endocrinology and Infertility
- Sex Hormone Disorders
- Reproductive Health
- Clinical and Reproductive Endocrinology
- Reproductive Toxicology
- Reproductive and Endocrine Cancers
- Reproductive Functional Disorders

- Your product/services gets good recognition and remuneration in the world

Sponsorship Packages

- Diamond Sponsor
- Gold Sponsor
- Silver Sponsor
- Bronze Sponsor
- Exhibition

For any other and customized packages, write to Program Manager.

About Tokyo

Japan is the second largest Life science market in the world after USA, Occupying about 10% of Market in each of the global drug and Medical devices market. According to Data monitor, the Japanese biotechnology market had total revenue of $ 43.3 Billion in 2013. By 2017, the market is expected to grow to $ 53.8 Billion.

The Japanese pharmaceutical market is the world's second-largest, with 2013 sales estimated at $115 billion. Japan accounts for a little less than 10 percent of the global Pharma market, compared with 38.4 percent for the U.S. and 20.7 percent for Western Europe

The Japanese market is a promising region for proteomics companies, as a high amount of proteomics research is being conducted in the country.

Best Places to Visit in Japan:

The most visited places would be Tokyo, Kyoto, and Nara. Some other places with some frequent tourist sightseeing include Nikko, Kamakura, Hakone, Osaka, and Hiroshima.

However, the most visited places are not necessarily the best. There are many excellent places that are not on the tourist radar.

The Yaeyama Islands and Okinawa are also very beautiful but get a lot fewer tourists.
