July 08-09, 2019, Vienna, Austria

AGENDA

Biography

EuroSciCon

Title: Myth or Medicine: Is Beauty Sleep More Than Skin Deep

Dr. Keira Barr,
Resilient Health Institute USA

As a global speaker, author, leader, and educator in her field, Dr. Keira Barr is a cutting edge, dual board-certified dermatologist. Dr. Barr shares her expertise as a domain subject matter expert, advisor to numerous start-ups, an editor and author for leading medical journals and a researcher in ongoing clinical trials. Her #1 Internationally Bestselling book, "The Skin Whisperer, A Dermatologist Reveals How to Look Younger, Radiate Beauty and Create the Life You Crave", helps anyone suffering from skin issues turn down their worry and overwhelm, turn up their self-confidence and gain essential skills to flourish in health, business, relationships and life. Through her programs, services and support, as the Chief Wellness Officer of Resilient Health Institute (RHI), by embracing what is on the surface as well as what's below it, she isredefining the delivery of skincare.

Title: The Journey Home from Trauma, A Study of Complementary Treatment.

Dr. Terry J Martin,
Journeys, Through Personal Growth Counselling & Associates, USA

Dr. Martin has an exemplary clinical career working with the military and their families. For over twenty-five-years he has done private practice, directed and managed multiple outpatient programs in federal, state, and private health care settings. He is currently in private practice in Aiea, HI, and lives with his family in Mililani, HI. He is a cognitive behavioural therapist who has a specialty treating soldiers and their families dealing with stress related issues related to deployment(s). He also specializes in conflict management with adults, marital issues, chemical dependency, anxiety and trauma issues. He specializes in Cognitive Behavioral Therapy as a treatment modality to help clients that are current or previous Military Service Members to deal with anxiety and/or depression.

Title: Activation of MAP Kinase and CREB-Mediated Transcription During REM Sleep is Required for Persistence of Hippocampus-Dependent Memory

Ms. Dan Storm,
University of Washington, US

Dr Storm received his PhD at the University of California Berkeley and did Postdoctoral Research at Harvard. He is currently a Professor at the University of Washington and has published over 300 papers and reviews most focusing on the molecular basis of memory.

Biography

EuroSciCon

Title: Nocturnal Arousals: Stirred, not Shaken

Dr. P.M. Haigh,
National Hospital for Neurology & Neurosurgery, UK

Dr Haigh arrived in the UK in the mid-to-late eighties, he trained and has worked in various London teaching hospitals and has developed an interest in the neuroscience of sleep, pain and also forensic medicine. He has published and presented in these areas. He has presented internationally and given teaching to post-graduate

Title: The Roles of Dreaming.

Dr. Sam Vaknin,
Southern Federal University, Russia

Sam Vaknin is the author of "Malignant Self-love: Narcissism Revisited" and other books about personality disorders. His work is cited in hundreds of books and dozens of academic papers. He spent the past 6 years developing a treatment modality for Narcissistic Personality Disorder (NPD). Over the years, with volunteers, it was found to be effective with clients suffering from a major depressive episode as well.

Title: A case of Very Severe Obstructive Sleep apnoea in Ireland.

Dr. Paul Byrne,
Peamount Healthcare, Ireland

Paul Byrne completed his training in St.Vincent's University hospital, under the care of Prof.W.Mc.Nicholas and his team. I now work in Peamouont Healthcare, as a senior Respiratory Physiologist , managing a small but efficient sleep department, where we offer Polysomnography (PSG) and limited sleep studies and then follow up and management of those patient's. We follow the American academy of sleep medicine, manual scoring rules, and place an emphasis on weight management, when appropriate, and a multi team approach to sleep therapy and long term care. I run a compliance therapy clinic every Monday, focusing on mask, titration issues, and sleep hygiene and therapy compliance.

Biography

EuroSciCon

Title: A novel method to non-invasively stimulate the diaphragm induces abdominal breathing and improves quality of sleep for multiple disorders

Dr. Zisi Fotev,
Satina Medical, Germany

Zisi Fotev is the founder and CEO of Satina Medical.. He has a BSc (Hons) degree from University of Western Australia and PhD from University of Tübingen, Germany and later Head of Cardiovascular Research at Merck, Germany. He was formerly CEO of Elchrom in Switzerland and Airway Medix in Warsaw and Tel Aviv

Title: EEG modulation during diagonal arms movements: implications for rehabilitation programs and sleep research.

Dr. Tal Dotan Ben Soussan,
Patrizio Paoletti Foundation for Development and Communication, Italy

Tal Dotan Ben-Soussan is the director of Neuroscientific Research Unit of the Patrizio Paoletti Foundation. Her pioneering work on the Quadrato Motor Training has demonstrated that specifically-structured sensorimotor activity can improve neurobiological, emotional and cognitive functions. Leading studies examining the effects of different training paradigms on neuroplasticity, resilience and well-being, Ben-Soussan's multidisciplinary approach utilises electrophysiological, neuroanatomical and molecular tools to examine the underlying mechanisms promoting cognitive and emotional well-being. She is also applying her neuroscientific model to examine the interconnectedness of motion, emotion and cognition in the workplace, in schools and as well as in neuropathological states.

Title: Dynamics of Brain Network Patterns of Activity during Sleep.

Prof. Radu Mutihac,
University of Bucharest, Romania

Professor Emeritus Radu Mutihac is Chair of Medical Physics, University of Bucharest, and works in Neuroscience, Signal Processing, Microelectronics, and Artificial Intelligence. As postdoc/research associate/visiting professor/full professor he has conducted his research at the University of Bucharest, International Centre for Theoretical Physics (Italy), Ecole Polytechnique (France), Institut Henri Poincaré (France), KU Leuven (Belgium). Data mining and exploratory analysis of neuroimaging time series were addressed during two Fulbright Grants in Neuroscience (Yale University, CT, and University of New Mexico, NM, USA).
