Dear Colleagues,

This is our awesome delight to welcome you to Osaka, Japan to attend the International Conference on plant and soil science composed by The Meetings International which will be held from Sept 17-19 , 2018. The meeting gives the worldwide field to global researchers and analysts to voice their examination discoveries to the world. With agents from all the significant nations in participation the environment is energizing with open and neighborly collaboration between participants.

Meetings International provides a Global Platform for Plant and Soil Science Professionals, Academicians, Medical and Research Professionals to Exchange Ideas, Knowledge and Networking at its 300+ International Conferences.

The Soil Science Conference 2018 will offer an exciting scientific program, composed of plenary lectures, including Workshops, poster and abstract-driven sessions presenting the latest research in the field of Soil Science and plant research. Furthermore, it will also provide an opportunity for young investigators to actively participate and present their research.

Conference Highlights :

- Soil Science: Research and advances
- Plant Science and Agriculture
- Food Safety, Quality and Security
- Soil Fertility and Soil-Plant Nutrition
- Soil Microbiology, Health and Bio Control
- Toxicology: Analysis
- Environmental Soil Chemistry and Biotechnology
- Soil Erosion and soil management
- Soil Geology, morphology and soil management
- Soil-Plant interaction and analysis
- Soil biodiversity with soil organic matter dynamics
- Environment Change and Plant Health
- Earth & Geosciences
- Management of Water and Soil Resources under Global Climate Changes
- Soil Genesis, Classification & Cartography, Geo statistics, Remote Sensing & GIS
- Soil Analytical Tools and Techniques for Soil Research Integrity
- Mitigation and Adaptation Strategies for climate Change
- Biodiversity
- Plant & Forest Ecology and its Diversity
- Forest Science and Technology
- Pedology
- Developing policies to prevent and control soil pollution
- Nanotechnology for Soil and Groundwater Remediation
