	Speaker Slot Available
Session Adjournment	

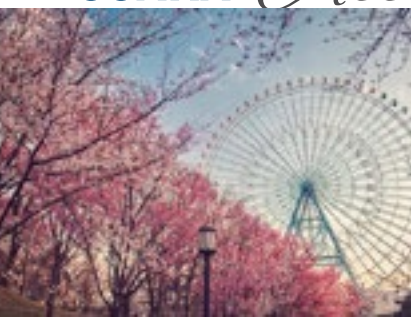

Day 2 program will be updated soon

NOTE: The final Scientific Program will be updated 30 days prior to the conference.

Explore **Osaka**

Osaka is a large port city and commercial center on the Japanese island of Honshu. It's known for its modern architecture, nightlife and hearty street food. Osaka was evaluated in Research & Development only. Osaka currently markets vaccines in Japan only and is growing its vaccine pipeline, including R&D projects for dengue and chikungunya. Osaka performs above average in Research & Development, and has clear access provisions for its late-stage vaccine candidate. While it does not currently market vaccines in countries in scope, it is taking steps to support affordability and supply of vaccines in its pipeline. The Travel and Tourism Competitiveness Report 2017 positions Japan fourth out of 141 countries for the most part, which was the best in Asia.
