About Prague

Venue:

Prague, Czech Republic

Prague, capital city of the Czech Republic, is bisected by the Vltava River. Nicknamed "the City of a Hundred Spires," it's known for its Old Town Square, the heart of its historic core, with colorful baroque buildings, Gothic churches and the medieval Astronomical Clock, which gives an animated hourly show. Completed in 1402, pedestrian Charles Bridge is lined with statues of Catholic saints.

The help of innovative work (R&D) is one of the Government's needs in the Czech Republic. The help of Vaccine R&D was at CZK(Czech Currency) 9.67 billion out of 1999 and has expanded to the current CZK 23 billion amid the most recent 10 years, which is an expansion of 238%. Estimated by the offer of GDP, we moved from 0.52% of every 1999 to 0.62% of every 2008, which is the normal accomplished by the EU-27. Notwithstanding this unquestionable positive pattern, the required for the development of the R&D standard and better utilization of its outcomes is apparent. The advantages for economy and society remain generally low in the Czech Republic. In some regard, it is a result of the present arrangement of R&D open help, which is somewhat decentralized.
