PLAN A TRIP TO Dubai, UAE: DESTINATION OF BIOPHARMACEUTICS AND PHARMACOKINETICS 2019

Dubai is the largest and most populous city in the United Arab Emirates (UAE). On the southeast coast of the Persian Gulf, it is the capital of the Emirate of Dubai one of the seven emirates that make up the country. Dubai is a global city and business hub of the Middle East. It is also a major global transport hub for passengers and cargo. Oil revenue helped accelerate the early development of the city, but its reserves are limited, and production levels are low: today, less than 5% of the emirate's revenue comes from oil. Dubai's economy now relies on revenues from tourism, aviation, real estate, and financial services. Dubai has attracted world attention through large construction projects and sports events, in particular the world's tallest building, the BurjKhalifa. The emirate of Dubai shares borders with Abu Dhabi in the south, Sharjah in the northeast, and the Sultanate of Oman in the southeast. Hatta, a minor exclave of the emirate, is surrounded on three sides by Oman and by the emirates of Ajman (in the west) and Ras Al Khaimah (in the north). The Persian Gulf borders the western coast of the emirate. Dubai covers an area of 1,588sq. mi (4,110 km2), which represents a significant expansion beyond its initial 1,500 sq. mi (3,900km2) designation due to land reclamation from the sea. As of 2012, Dubai was the most expensive city in the Middle East. In 2014, Dubai's hotel rooms were rated as the second most expensive in the world

Therefore, we look forward to an exciting scientific event, business meeting, trade fair and exhibition and welcome you to join us at "Annual Congress on Biopharmaceutics and Pharmacokinetics" in the Dubai, UAE.
