GROUPS OF COMMON INTEREST
A NEW PATH ON RESEARCH TEACHING

Corina Mariela Alba-Alba[1], Miguel Ángel Pérez Méndez[2,3], Digna Yazmin Martínez-Rosado[2,4], María del Rosario Ramírez-Machorro[2,5]

PhD, RN [1], Undergraduate Nursing Student[2]

INTRODUCTION

This poster presents an experience of a group of volunteer students that attend practice sessions of research were they investigate any topic they want in very simple form under the proposed method “Less Research Theory, more practice”. The students meet one hour per week discussing their topics of interest in a voluntary manner and they collaborate between each other.

METHODS

For years, the traditional teaching of Research in Nursing has been rejected by the students because they don´t perceive the utility of research in their lives as nurses or they perceive that, this subject has a lot of theory, which it is so far from their ideas of Nursing Practice. Then, How can we form new researchers in nursing without falling in the intent?

RESULTS

After two years of work, we started with 6 nursing students of different semesters and now we are a Formal Student Organization called “Frontiers of Health Research” with around 25 elements doing and learning research with no theoretical classes. Although it is not an obligatory course, this academic activity has produced a total of 13 research that were presented nationally and internationally in the last 2 years, and counting. This is a significant mayor production than the production of mandatory courses.

CONCLUSION

There is nothing better than to learn what you want. This is true meaningful learning. The students here has experimented by his own the research and the results has been more successful than those students with traditional teaching. More schools must to open this voluntary groups in order to promote research in nursing.

STUDENTS	CONGRESS NAME/RESARCH TOPIC	YEAR/LOCATION
Ramírez-Machorro, María del Rosario; Ramírez-Machorro, Rosario Guadalupe and Corina M. Alba-Alba, PhD, RN.	**28th Edition of World Congress on Nursing Education & Research** *Bibliographic review on cardiovascular risk in Mexican people.*	April, 2019 London, England
Reyes- Vázquez, María de las Mercedes Nuri and Rosario Guadalupe Ramírez- Machorro.	**28th Edition of World Congress on Nursing Education & Research** *Level of Confrontation and Adaptation in Men and Women with Cancer.*	April, 2019 London, England
