Materials Engineering Conference

October 20-21, 2021 | Osaka, Japan

https://www.meetingsint.com/conferences/materialsengineering

Invitation

Dear Attendees

Meetings International proudly announces the ***Materials Engineering Conference*** scheduled during ***October 20-21, 2021 in Osaka, Japan***

The conference emphasizes the theme "***Advancing the research & innovation on Materials Engineering and Nanotechnology.***"

Materials Engineering 2021 gathering gives a mind-blowing opportunity to discuss the latest progressions inside the field. This conference brings together the innovations in Sensors and brings the key opinion leaders and thought leaders in the field from around the world for two intensive days of scientific presentations, networking as well as engagement with companies developing innovations in tools and technologies in this space. The purpose of Materials Engineering 2021 is to provide an international technical forum to showcase recent advances in Materials Engineering conference operation committee is providing a platform for all the budding young researchers, young investigators to showcase their research and innovation.

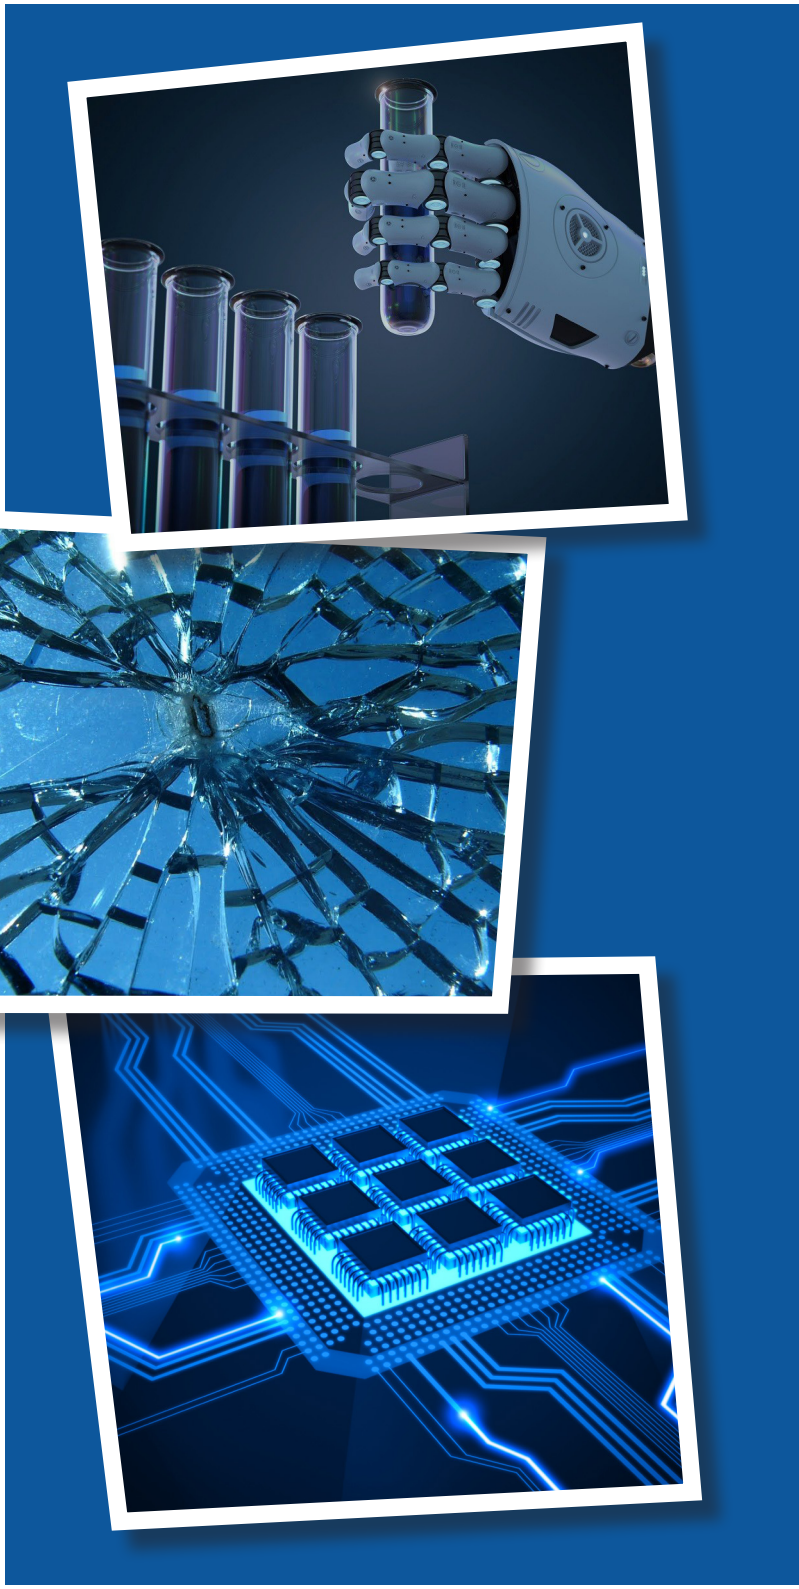
Sincerely,

Operating Committee

Materials Engineering 2021

Conference Highlights

- Materials Engineering and Technology
- Advanced Materials Devices
- Advanced Biomaterials and bio devices
- Graphene and 2D Materials
- Emerging Smart Materials
- Polymer Science & Engineering
- Biosensors and Bioelectronic Materials
- Materials for Green Technology
- Nanotechnology
- Sustainable Energy and Development
- 3D printing materials
- Advanced Ceramics & Composite Materials



- To identify the future directions of research
- Peer review and high quality publication
- Quality research

Osaka Attractions

Explore Osaka

Osaka is a designated city in the Kansai region of Japan. It is the capital city of Osaka Prefecture and the largest component of the Keihanshin Metropolitan Area, the second largest metropolitan area in Japan and among the largest in the world with more than 20 million inhabitants. Osaka was traditionally considered Japan's economic hub. By the Kofun period (300–538) it had developed into an important regional port, and in the 7th and 8th centuries it served briefly as the imperial capital. Osaka continued to flourish during the Edo period (1603–1867) and became known as a center of Japanese culture. Following the Meiji Restoration, Osaka greatly expanded in size and underwent rapid industrialization. In 1889, Osaka was officially established as a municipality. Today's Osaka is a major financial center of Japan. It is home to the Osaka Securities Exchange as well as the multinational electronics corporations Panasonic and Sharp.

Famous landmarks in Osaka include Osaka Castle - which played a pivotal role in the Siege of Osaka and was featured in the 1980 American television mini-series "Shogun") and Shitenno-ji - the oldest Buddhist temple in Japan.
