

Be a part of
International Conference on
Neonatology and Pediatrics

August 19-20, 2019 -- Hotel Park Inn By Radisson
Toronto Airport West

Dear Colleagues

Meetings International proudly announces the **International Conference on Neonatology and Pediatric** scheduled during **August 19-20, 2019** in **Toronto, Canada**. The conference emphasizes

The theme “**Ethical Aspects of Neonatal Care and Interventions to Improve Neonatal Health**”.

Meetings International provides an international dais for scientists and Neuroscience professionals to

Exchange Ideas, Knowledge and Networking at its 100+ International Conferences. The importance of Neonatology has come into spotlight in the recent years. It will focus on the latest provoking topics and research in the field of Neonatology and Pediatrics. Neonatology 2019 provides a platform to all experts to put forth their research studies and experiments before a large number of individuals who have a keen interest in the field of Neonatology. The series of talks, poster presentations, workshops, discussions will keep participants hooked to the event and increase their interest in learning at Neonatology 2019

Glimpses

About Toronto

Toronto is the capital city of the province of Ontario in Canada. It is the largest population centre in Ontario by population over 5 million. It is situated on the north-west shore of Lake Ontario. There are more people reside in the regions around it. Toronto's motto is "Diversity Our Strength. This city is a global finance, commerce as well as transportation hub. It has always been ranked highly in the fields of life expectancy, personal safety, healthcare, education etc. When compared to 19 similar Organization for Economic Co-operation and Development (OECD) countries, U.S. babies were 3 times more likely to die from extreme immaturity and 2.3 times more likely to experience sudden infant death syndrome. The reason U.S. has fallen behind includes higher poverty rates as compared to other developed countries. Premature delivery and low birth weight have been consistently associated with poverty, which affects over 20% of U.S. children.
