Importance & Scope

Women's health is a major determinant of our nation's health and the health of future generations. Women's health is about all health issues that affect women. Women's health is about recognizing the diversity of women's lives and the diversity that exists among women. Women are most often the influential household decision makers regarding health care.

Euro Women Health Care-2015 is focused on the importance of regular physical activity and health awareness for women. Euro Women Health Care-2015 will challenge attendees to new health goals and empower them with tools and resources. By bringing women together, a positive energy is created and attendees will leave motivated to make changes.

Euro Women Health Care-2015 will encourage and empower women to take control of their own health first, so they can be the caretakers of their household's well-being.

Euro Women Health Care-2015 brings together health practitioners from many disciplines that have a strong interest in advancing women's health research and prevention strategies. Conference topics include issues that are of special concern to women and their families such as breast cancer, menopause, eating disorders, alternative medical treatments, exercise and wellbeing.

Why Alicante?

Alicante is the second-largest Valencian city and ranked as the eighth-largest metropolitan area of Spain. The population of the city of Alicante was 334,329 inhabitants and 771,061 in the metropolitan area "Alicante-Elche". Alicante enjoys mild winter temperatures, warm to hot summers, and little rain concentrated in equinoctial periods.

Alicante is one of the fastest-growing cities in Spain. The local economy is based upon tourism directed to the beaches of the Costa Blanca and particularly the second residence construction boom which started in the 1960s and reinvigorated again by the late 1990s. Services and public administration also play a major role in the city's economy. The latest of many public battles concerns the plans of the Port Authority of Alicante to construct an industrial estate on reclaimed land in front of the city's coastal strip, in breach of local, national, and European regulations.

The city is the headquarters of the Office for Harmonization in the Internal Market and a sizeable population of European public workers lives here. University of Alicante is located in San Vicente del Raspeig, right next to Alicante. More than 25,000 students attend the University.
