

Exploring and Debunking Steroids

Summary

The legitimate use of anabolic steroids for a variety of medical problems also continues, ranging from the treatment of Andropause or Menopause, and ranging from speeding the recovery in burn victims to helping improve quality of life in Aids patients, to helping fight breast cancer and stave off osteoporosis.

Currently, steroid use is far from declining. Among 12th graders who have admitted to using steroids surveyed in 2013, 4.1% reported using steroids at least once in their lives, while in 2006 the number was 2.7%. 80% of athletes using steroids show biochemical abnormalities of the liver. Steroids users are 56% more likely to experience increase in irritability and aggressive behavior.

Importance & Scope:

Steroids -2015 aims in promulgating knowledge and facilitating share of new ideas amongst the professionals, scientific researchers, doctors, clinicians, physicians, industrialists, manufacturers, sportsperson and students. The exhilarating scientific program is going to have presentations on most ingenious, modernistic and recent research activities. The meeting will reflect the interdisciplinary research on steroids, involving aspects of medicine, analytics, chemistry, physiology, bioinformatics and drug discovery. This program provides three days of robust discussions on recent research and advancement in the field of endocrinology and metabolism.

Steroids-2015 is an international platform to discuss state-of-the-art research in the fields related to hormonal steroids and to educate and safeguard against the abuse of anabolic steroids. It also provides the chance to establish an effective networking between scientists, clinicians, fitness trainers and surgeons and update knowledge of the pathophysiology, diagnosis, and treatment of several diseases or conditions related to hormonal steroids.

Why Baltimore?

Baltimore is the largest city in the U.S. state of Maryland and the 24th largest city in the country. It is located in the central area of the state along the tidal portion of the Patapsco River, an arm of the Chesapeake Bay. The independent city is often referred to as Baltimore City to distinguish it from surrounding Baltimore County. Founded in 1729, Baltimore is the second largest seaport in the Mid-Atlantic United States and is situated closer to Midwestern markets than any other major seaport on the East Coast. Baltimore's Inner Harbor was once the second leading port of entry for immigrants to the United States and a major manufacturing center.

With hundreds of identified districts, Baltimore has been dubbed "a city of neighborhoods," and is nicknamed Charm City. The talents of writers Edgar Allan Poe and H.L. Mencken, musician James "Eubie" Blake, and singer Billie Holiday, as well as the city's role in the War of 1812 and Francis Scott Key's writing of "The Star-Spangled Banner" have all influenced the city's historical importance. Baltimore exhibits examples from each period of architecture over more than two centuries, and work from many famous architects such as Benjamin Latrobe, George A. Frederick, John Russell Pope, Mies van der Rohe and I. M. Pei. The Baltimore Area is known for health and science, which is in part attributed to the prestigious Johns Hopkins University school system, the University of Maryland-Baltimore, and other

smaller schools such as University of Baltimore, University of Maryland-Baltimore County, Loyola University and University of Notre Dame.

Why to attend???

Steroids-2015 could be an exceptional event that brings along a novel and International mixture of giant and medium steroids analysis, leading universities and steroids manufacturers creating the conference an ideal platform to share expertise, foster collaborations across trade and world, and assess rising technologies across the world. World-renowned speakers, the most recent techniques, tactics, and the newest updates in steroids fields are hallmarks of this conference.

Unique Opportunity for Advertisers and Sponsors at this International event:

Major Associations around the Globe

- British Menopause Society
- British Association of Endocrine and Thyroid Surgeons
- British Fertility Society
- British Society for Neuroendocrinology
- Royal Society of Medicine Endocrinology and Diabetes Section
- International Society of Gynecological Endocrinology
- Australasian Menopause Society Limited
- European Society of Endocrinology

Major Associations in USA

- American College of Physicians (ACP)
- The American Association of Clinical Endocrinologists (AACE)
- The Endocrine Society
- The American Diabetes Association (ADA)
- The American Association of Diabetes Educators (AADE)
- The American Thyroid Association (ATA)
- The International Society for Clinical Densitometry (ISCD)
- The American Dietetic Association
- North American Menopause Society (NAMS)
- American Society for Reproductive Medicine

Statistical Analysis of Associations

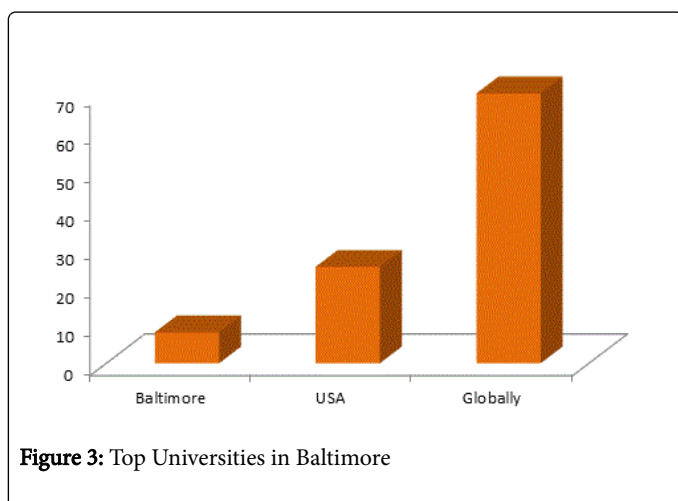

Target Audience

Scientists, Professors from Biochemistry, Biology, Organic Chemistry, Genetics, Health Science, Neuroscience and many more departments, Industrialists, Doctors (Endocrinologist, Orthopedics, Cancer specialist, Gynecologist, Pediatrician, Physicians, Neurosurgeons etc), Nutritionists, Sportspeople, Bodybuilders, Steroids Manufacturers, Rehabilitation centers, Societies for Drug Abuse, Analytical Instruments Manufacturers and Youth

Top Universities in Baltimore

- University of Maryland Medical Center
- Johns Hopkins university
- University of Maryland
- Towson University
- Morgan State University
- Baltimore University
- Loyola University
- Coppin State University

Major Hospitals in Baltimore

- Johns Hopkins Hospital
- Mercy Medical Center
- University of Maryland Medical Center
- MedStar Franklin Square Medical Center
- Holy Cross Hospital

- University of Maryland St. Joseph Medical Center
- MedStar Good Samaritan Hospital
- University of Maryland Medical Center Midtown Campus
- St. Agnes Hospital
- Johns Hopkins Bayview Medical Center

Companies Associated with Steroids Manufacturing

IsoSciences

- Aldosterone
- Allopregnanolone
- Boldenone
- Cholesterol
- Estrone
- Pregnenolone

Medical Isotopes

- Aldosterone-d7
- Cholestane-3,3-d2
- Estrone-2,4-d2
- Allopregnenolone
- Progesterone

Spectrum Chemical Manufacturing Corp

- Testosterone
- Estradiol valerate,
- Estradiol cypionate

EUROCHEM Laboratories

- Nolvadex
- Clomid
- Turanol
- Oxythol
- Stanol

Chemo Dynamics

- 3'R)-Spiro[oxirane-2,3']-17'- -butoxycarbonyl-17'-aza-D-homo-5 – androstane
- Aza-D-homoandrostane-3 -ol; 10a,12a-Dimethyl-octadecahydro-1-aza-chrysen-8-ol

Cerilliant Corporation

- Androstenedione
- Aldosterone
- Corticosterone
- Estrone
- Estriol

Saffron Biotech

Pfizer

- Premarin family
- Depo-Provera
- Viagra

Alfa Aesar

Steroids Analysis

The legitimate use of steroids for a variety of medical problems also continues, ranging from the treatment of Andropause or Menopause, and ranging from speeding the recovery in burn victims to helping improve quality of life in Aids patients, to helping fight breast cancer and stave off osteoporosis.

Currently, steroid use is far from declining. Among 12th graders who have admitted to using steroids surveyed in 2013, 4.1% reported using steroids at least once in their lives, while in 2006 the number was 2.7% [2].

Steroids in H.S. Sports facts reveal that 85% of all teen athletes are reportedly not educated on the side effects of steroids. 4.4% said it was “fairly easy” to obtain steroids and 11% of high school males said that they at least “tried” [1].

A recent study also concluded that anabolic steroid use among weightlifters and bodybuilders continues and by all accounts, there are

no signs of it stopping in athletics any time soon. 80% of athletes using steroids show biochemical abnormalities of the liver. Steroids users are 56% more likely to experience increase in irritability and aggressive behavior.
